KEYSTONE UNIVERSAL POINT SYSTEM

The **Universal Point System** is composed of three distinct divisions, the first being commonly known as

UNIVERSAL POINT BODIES

meaning that each size of Type, Spaces and Quads, Brass Rules, Leads and Slugs made by us is accurate to a standard number of points for that body. The second being commonly known as

UNIVERSAL POINT LINE

meaning that the face, or printing surface of each size is cast in such position on the body that when two or more sizes are set into a line, Point Leads and Slugs above and below the smaller **sizes** will **throw** all **characters** into **perfect alignment** at the **bottom**, while all **faces cast** upon one body line accurately without any **justification** as here shown. The third being commonly known as

UNIVERSAL POINT SET

meaning that each letter or character is cast to the standard width, consisting of so many points or fractions thereof as are best suited to it. Lines of Point Set Type will therefore space evenly to any measurement of even points, and will justify perfectly without the use of cardboard and paper, as was heretofore necessary with type not cast to Point Set.

The above briefly outlines our Universal Point System and its advantages, and gives some idea of the accuracy attained in the manufacture of Keystone Nickel-Alloy Type, the popularity of which proves the adaptability of the system.

KEYSTONE TYPE FOUNDRY

Selling Information

MISCELLANEOUS

All prices in this book are subject to the prevailing discounts. We issue a vest-pocket discount booklet which contains everything we make or sell. If you have not received one we will be pleased to furnish it on request.

Prices and Discounts are Subject to Change Without Notice

This book should not be cut or mutilated in any way. It is only necessary to give the size, name and number (if any) of the Type, Border, Rules or article desired to insure the accurate filling of the order. When ordering Type or Material make a separate line or paragraph of each item. Write on one side of sheet only and if sending a letter at the same time as order write the letter on a separate sheet.

Read your order carefully before mailing. The omission of a number or name, of size always means delay and annoyance.

In ordering Chases the best plan is to send a diagram along with the order, giving both the "inside" and "outside" measurements. Chases are never kept in stock but are made to order and are not returnable.

If you have any preference in the shipping of your order, please state by what route—whether by boat, freight or express. Unless so designated we shall ship according to our best judgment.

Mail parcels are limited to 4 pounds in weight, although type weighing over 4 pounds can be divided, if so desired, and sent by mail. Experience has taught us, however, that it is far safer and generally cheaper to send more than 2 pounds by express.

No claims for shortage will be allowed on any font unless a proof of such font *before being laid* accompanies such claim. Each font is guaranteed to be perfect. In laying type the regular paging galleys used by founders measuring 5x6 inches inside will be found very useful. We are always glad to correct any mistakes made in putting up or sending out our goods. Any claims of this nature should be made without delay.

When desiring an estimate for a printing outfit of any size, the best and quickest way is to send us a complete list of the items wanted. We can then immediately affix our lowest prices, and return it to you with full particulars. See page 14.

We are continually issuing Specimen sheets showing new Types, Borders, Ornaments, etc., made by us. If you fail to receive them, please notify us. Also advise us of any change in your firm name or location.

Wood Type, Borders, Ornaments, Indexes, etc., furnished promptly at lowest prices. It being impracticable to show in this book a creditable line of wood type faces, we will send to any of our customers requiring it, a complete specimen book of all faces made by the *Hamilton Mfg. Co.*, whose book contains all modern faces.

All accounts must be settled monthly unless otherwise arranged at time of purchase. Overdue accounts subject to sight draft. Parties having no established credit or arrangement with us will kindly send references with order.

BRASS TYPE

We are exclusive agents in the following states: Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, Pennsylvania, New Jersey, Maryland, District of Columbia, Delaware, Virginia, West Virginia, North and South Carolina, Georgia, Florida and on the Pacific Coast for the **Brass Type, Borders and Ornaments** made by *The Missouri Brass Type Foundry Co.*, of St. Louis, Mo. See page 299 for further particulars.

18 Point	40	40	40	39	38	37	36

ALL SIZES LARGER THAN 18 POINT AT JOB TYPE RATES

The quantity prices of Body Type not allowed if made of small fonts.

Italics are not furnished with Body Types unless specially ordered. (See Italic information on page 23.)

Accents for Body Type when furnished with regular weight fonts will be sold at same price per pound as the font. Ordered separately, they will be treated as sorts. See pages 300 to 307 for accents made.

When purchasing Roman Fonts weighing 50 pounds and over, figure not less than 90 per cent. of the weight as letter and spaces, and not more than 10 per cent. as 1, 2 and 3-em quads. The 10 per cent. of quads will be at quad rates; the 90 per cent. of letter and spaces at Roman rates. Quads contained in 25 and 50-pound Roman fonts go in at letter rate.

German Body Letter and Mailing Type same rate as Body Type.

Smallest Fonts of Body Letter cast to Regular Scheme: 5 point, 12½ pounds or multiples thereof: 5½ to 18-point inclusive, 25 pounds or multiples thereof.

Parts of Body Letter Fonts cast to Regular Scheme for 25 pounds sold at regular pound prices in the following sub-divisions, providing no character or characters are omitted:

Caps weigh 2½ pounds	Lower Case a to z . . weigh 14½ pounds
Small Caps weigh ¾ pound	Spaces weigh 2½ pounds
Point Fonts weigh 1⅞ pounds	Quads weigh 2½ pounds
Figure Fonts weigh 1 pound	For larger fonts multiply these weights

Auxiliaries for 100 pound Body Letter Fonts:

Braces and Dashes . . weigh 1 pound	Leaders, 3 and 5 pound font assortment or multiples thereof.
References and Indices weigh ½ pound	Logotypes for Mailing Type, 2 and 5 pound font assortments or multiples thereof.
Fractions weigh 1 pound	
Commercial Marks . . weigh 1 pound	

The Auxiliaries or "Sundries" for Body Letter fonts will not be sent unless specially ordered, and the above are the smallest quantities put up. By ordering them in their regular packages you will save extra charge.

SELLING INFORMATION, (Continued)

BODY-TYPE

Stock weight fonts of Body Type weigh 25, 50 and 100 pounds or multiples thereof, except 5-point, which is carried in stock in 12½ pound fonts. If a customer orders *lower case only* for say 25, 50 or 100 pound fonts, he will get lower case "a" to "z" and the necessary points. No figures, spaces or quads will be included with such an order unless specified.

The following faces are carried in stock in fonts of 25 pounds, 50 pounds, 100 pounds, or multiples thereof, up to and including 18-point and sold at Body Type weight font prices as shown on page 18; sizes above 18-point are sold at second-class or second-class special prices, depending on style of face:

Cardinal, Caslon Old Style, Caslon Bold, Dickens, French Old Style, Lining Keystone Old Style, Lowell, Old Style No. 2, and all Modern Body Letter faces. For Italics see page 23.

Regular small caps are not made for Cardinal. If they must be supplied they will have to be cast to order as follows: 6-point on 8-point body; 8-point on 10-point body and 10-point on 12-point body. We cannot furnish small caps for 6-point.

Caslon Old Style cent mark made in sizes: 6, 7, 8, 9, 10, 11, 12, 14, 16 and 18-point, viz: ¢. Sold in quantities of 1 pound and over of any one size at Body Type prices; less than 1 pound as sorts.

Faces cast on other than their own body will be furnished only on special order

When ordering sorts send capital "H" and lower case "m" (as little used as possible) of the type wanted; also give the quantity of each character in ounces or pounds of all type smaller than 12-point; larger than 12-point the number of each character required. If possible give the name or number, or both, and size of body of face desired.

When sending samples always be sure they are enclosed with order. The failure of samples to reach us causes much delay in the filling of orders.

Spaces and quads, unless otherwise ordered, will be included in all orders for Roman or German Body Type fonts. If the spaces and quads are omitted from a 100 pound font, the letter alone will weigh 80 pounds, as the spaces and en quads weigh 10 pounds, and the 1, 2 and 3 em quads also weigh 10 pounds. If 100 pounds of letter only is wanted we can furnish it out of a 125 pound font. This would amount to about 100 pounds. We can also furnish multiples of 20 pounds (which is the letter for a 25 pound font); that is 20, 40, 60, 80 pounds of letter.

It would be well to note that if the total weight of a font equals 500 pounds, or any other quantity mentioned in the table of first-class pound prices, the reduced rate applies. If by the omission of any sorts, such as spaces or quads, etc., the weight falls below the required amount, the reduced rate will not apply unless the difference is made up by the addition of sorts or other characters of the same body and face.

How to estimate Body Type and other General Information see pages 24 to 29.

We are especially well equipped with latest improved machinery for nicking type for all composing machines on the market setting foundry type.

SELLING INFORMATION, (Continued)

JOB TYPE WEIGHT FONTS

All Job Type faces, (including italics in 25 lb. fonts and over,) except Extra Condensed, Rimmed, Shaded, Script and Cored Type are Second Class.

All faces 66-point and smaller known as Extra Condensed all Job and Body Italics, all Rimmed, Rimmed and Shaded, Text and Shaded Letters (by Rimmed is meant a letter with a fine hair line surrounding it or a fine hair line shading) and all Cored Type are Second Class Special.

All Scripts, Rimmed, Shaded and Extra Condensed faces, 72-point and larger (not cored) also all faces excepting Scripts, Rimmed, Shaded and Extra Condensed, 72-point and larger (cored cast) are Second Class Special.

The following pound prices are for fonts of one body, face and line ordered at one time cast to regular scheme:

144 Point	40	40	40	44	44	44

Larger quantities of above at special prices.

The quantity prices of Job Type not allowed if made up of small fonts.

Job Type Weight Fonts (except Scripts) do not contain spaces and quads.

Job Face Figures, of one body, face and line ordered at one time (other than Italic, Extra Condensed, Rimmed, Shaded, Text, Scripts, and white faced Time Table Figures), 100 pounds and over, at Job Letter price for 1000 pounds.

Job Type Figure Fonts including or excluding dollar mark, lower case "c" or cent mark put up in 5 pound assortments or over. See pages 310 to 326.

Job Type Accents when sold with regular weight fonts will be charged same price per pound as the font; ordered separately they will be charged at same rate as the font, with a minimum charge of 35 cents but no matrix charge (see pages 300 to 307 for Job Type Accents and accents made and carried in stock).

JOB TYPE

Weight fonts of Job Type carried in stock, of bodies 36-point and smaller weigh 25 pounds, and larger than 36-point, 50 pounds. Anything less than these quantities of respective bodies is special and must be cast to order. Job Type Weight Fonts charged at actual weights. The following faces carried in stock in fonts as above: Admiral, Lining Ancient Roman, Ben. Franklin, Ben. Franklin Condensed, Chamfer Gothic, Compressed Gothic, Caslon Bold Title, Caslon Bold, Lining DeVinne, DeVinne Outline, De Vinne Condensed, Lining DeVinne Condensed, DeVinne Extra Condensed, Encore, Encore Condensed, Encore Extended, Gothic Condensed, Gothic Condensed No. 3, Gothic No. 2, John Alden, John Hancock, John Hancock Condensed, John Hancock Extended, Laureate, Lining Gothic No. 14, Old Style Antique, Penn Gothic, Powell, Richelieu, Salem, Standard Gothic, Washington Text, Elite Typewriter, Remington Typewriter, Smith-Premier Typewriter, also Cardinal, Caslon Old Style, Keystone Old Style and Lowell, 20-point and larger.

For Law Italic sold in weight fonts, see Body Italic Fonts, page 23.

All cap and lower case Job Fonts are schemed as far as practical at the following ratios—everything except Texts, German, Scripts, Law or Legal Italics, Typewriter and Circular Letter faces at 2a to 1A; Texts, German and Circular Letter faces at 3a to 1A; Typewriter and Legal or Law Italic faces at 5a to 1A; Scripts, 12-point and smaller 4a to 1A; 14-point and larger 3a to 1A. See schemes on pages 16 and 17.

PRICES FOR MATRICES

Imprint Matrices—Any face that can be electrotyped.

Above prices in addition to cost of matrices. Imprints may be made of one or two matrices at the option of the foundry. Prices are for type cast from one matrix or set of matrices of the same body, face and line.

SELLING INFORMATION, (Continued)

LIST PRICES OF QUADS

Regular stock, point body 1, 2 and 3-em quads (high or low) of one body, ordered at one time, assorted sizes or separately.

BODY	LESS THAN 6 LB.	6 LB. & OVER & LESS THAN 50 LB.	50 LB. & OVER & LESS THAN 100 LB.	100 POUNDS AND OVER
5 Point	\$1 20	\$1 00	\$0 70	\$0 60
5½ Point	74	62	45	40
6 Point	64	54	40	36
7 Point	56	50	38	34
8 Point	52	45	36	32
9 Point	48	42	34	31
10 Point	46	40	32	30
11 Point	44	38	30	28
12 Point	42	36	28	26
14 Point and larger	40	36	26	24

The list prices on all spaces, en spaces and justifiers less than 1-em body, will be the regular Roman rate.

An ordinary package of any size quads weighs about 6 pounds and comes under the reduced rate. Customers should order complete pages so as to avoid breaking packages and delay.

Quads represent 10 per cent. of the weight of Roman fonts, and are put up with the fonts as usual. They are charged separately at quantity rates when the font weighs 60 pounds or over, but with Roman fonts of 50 pounds, or less, they are charged same rate as the letter and spaces.

Unless otherwise ordered 1, 2 and 3-em quads will be put up with all Roman weight fonts, the same as heretofore.

Regular and high 1, 2 and 3-em quads are cast in all sizes up to and including 12-point; 1 and 2-em quads are cast in all sizes, regular and high, up to and including 24-point; from 30 to 54-point inclusive, regular and high, em quad is the largest. 60 to 96-point, regular and high, en quad only.

JOB FONTS OF SPACES AND QUADS

Following fonts put up in about the ratio of one-half quads to one-half spaces:

5 Point . . . 1 lb.	\$1 20	20 Point . . . 1 lb. 14 oz.	\$0 75
5½ Point . . . 1 lb. ½ oz.	75	24 Point . . . 1 lb. 14 oz.	75
6 Point 15 oz.	60	30 Point . . . 1 lb. 14 oz.	75
7 Point . . . 1 lb. 1¼ oz.	60	36 Point . . . 2 lbs. 2 oz.	85
8 Point . . . 1 lb. 1 oz.	55	42 Point . . . 2 lbs. 6 oz.	95
9 Point . . . 1 lb. 2½ oz.	55	48 Point . . . 2 lbs. 12 oz.	1 10
10 Point . . . 1 lb. 3¼ oz.	55	54 Point . . . 3 lbs. 2 oz.	1 25
11 Point . . . 1 lb. 2¾ oz.	50	60 Point . . . 3 lbs. 6 oz.	1 35
12 Point . . . 1 lb. 3¼ oz.	50	72 Point . . . 4 lbs.	1 60
14 Point . . . 1 lb. 6 oz.	55	84 Point . . . 4 lbs. 10 oz.	1 85
16 Point . . . 1 lb. 14 oz.	75	96 Point . . . 5 lbs. 6 oz.	2 15
18 Point . . . 1 lb. 14 oz.	75		

Justifiers 1, 3 and 5 units for Typewriters put up in one and five pound fonts, and are sold at body type prices per pound.

Circular Quads—per font \$3 50

Angular Quads—Sets of four—12, 18 or 24-point, 20c.; 36-point, 25c.; 48-point 30c.; 60-point, 35c.; 72-point, 40c.; font of four of each size, \$1.50.

Quotation Quads—(Smaller than 2x4 ems). Sizes 14-point and larger, 6 pounds or less 50c. per pound; 6 pounds and over and less than 50 pounds, 46c. per pound; 50 pounds and over and less than 100 pounds, 36c. per pound; 100 pounds or over 34c. per pound.

SELLING INFORMATION, (Continued)

BODY ITALIC FONTS

Second Class Rate, regular fonts of 25 pounds and over.

Second Class Special Rate in less than 25 pound fonts.

Body Italic Fonts will be cast according to the following 100 pound scheme, and divided into 5 and 10 pound fonts, except 5, 5½, 6 and 7-point, which can be divided into 2½ pound fonts.

Lower case	58¾ pounds
Caps	27 pounds
Points	6¾ pounds
Figures	8¾ pounds
	100 pounds

The following Body and Job Italic faces are carried in stock in fonts of 25 pounds, 50 pounds, or multiples thereof, and are sold as above:

Cardinal Italic, Caslon Old Style Italic, Caslon Bold Italic, French Old Style Italic, Lining Keystone Old Style Italic, Charter Oak, Inclined Gothic, Niagara, Priscilla, DeVenne Slope.

Weight Fonts of all Italics will be sold as above. Of course Job Face Italics will be put up in Job fonts as heretofore, but Italic made for Roman faces, if smaller than 8-point, will be carried in 2½ pound fonts or multiples thereof; if 8-point or larger, 5 pound fonts or multiples thereof.

Cardinal Italic, Caslon Old Style Italic, French Old Style Italic, Lining Keystone Old Style Italic, Old Style No. 2 Italic, and all modern Body Italics are carried in stock in the size fonts and at the prices shown in the following table:

Minimum Size or Multiple Fonts

POINT	MINIMUM WEIGHT, POUNDS	PRICE PER POUND	MINIMUM PRICE PER FONT	POINT	MINIMUM WEIGHT, POUNDS	PRICE PER POUND	MINIMUM PRICE PER FONT
5	2½	\$2 00	\$5 00	11	5	\$0 78	\$3 90
5½	2½	1 60	4 00	12	5	74	3 70
6	2½	1 28	3 20	14	5	70	3 50
7	2½	1 12	2 80	15	5	70	3 50
8	5	1 00	5 00	16	5	68	3 40
9	5	90	4 50	18	5	66	3 30
10	5	82	4 10				

Body Italic fonts ordered less than the above minimum weights will be sold at the minimum font prices.

Body Italic fonts weighing more than the above minimum weights will be billed at the pound rate according to quantity. (See Second Class and Second Class Special tables on page 20.)

BORDERS

Running Border Prices—The following prices supersede all Running Border prices in our Specimen Book or sheets. See Specimens of Border pages 387 to 419

SIZE	FEET IN FONTS INCLUDING CORNERS	SETS OF CORNERS WHEN MADE	PRICE	SIZE	FEET IN FONTS INCLUDING CORNERS	SETS OF CORNERS WHEN MADE	PRICE
6 Point	5	4	\$1 50	24 Point	3	2	\$1 65
9 Point	4½	4	1 40	30 Point	2	1	1 35
12 Point	4½	4	1 50	36 Point	2	1	1 65
18 Point	3	2	1 30	48 Point	1½	1	1 50

Note also that these Borders are *carried in stock in fonts only*, and when separate characters are desired they will have to be cast to order, and sold as sorts. The prices *do not* affect Combination Borders or Ornaments in fonts.

General Information

OLD METAL

Send for latest quotations

Boxing and Marking.—When shipping, mark boxes and freight receipt "Type Dross," which will secure a lower freight rate.

Old metal should be securely boxed and plainly directed, (we will send tags for this purpose if desired), the shipper's name placed on lower left hand corner of box. The foundry should be promptly notified of shipment, together with the net weight of metal sent. Old type, electros, stereotypes and brass should never be mixed together, as a separate value attaches to each.

Same as Cash.—Metal shipped to us as above will be credited as cash, at the prevailing prices per pound, and the cash discount will be allowed if the metal is received during the cash discount time, in payment for Nickel-Alloy, Universal Line Type, Borders, Ornaments, Brass Rule, Leads, Slugs, and other printing material sold by us.

Plate Matter and Bases.—Plate matter and plate bases furnished printers by Newspaper Unions will not be accepted at any price.

Special Notice.—Type melted and run together, zinc plates, metal containing zinc or type and other plates mixed with zinc plates *will not be received* at any price.

We make no allowance for Aluminum Alloy type made especially for typesetting machines; the printer can sell direct to the manufacturers of the machines.

APPROXIMATE NUMBER WORDS TO SQUARE INCH

For calculating the number of pages a manuscript will occupy.

WORDS TO SQ. IN.	WORDS TO SQ. IN.	WORDS TO SQ. IN.

6 Point 576	9 Point 256	12 Point 144

TYPE STANDARDS

The basis of measurements adopted by the International Typographical Union is the lower-case alphabet, from "a" to "z" inclusive, and the ems used are the same body as the type measured.

4½ Point 18 ems	6 Point 15 ems	10 Point 13 ems
5 Point 17 ems	7 Point 14 ems	11 Point 13 ems
5½ Point 16 ems	8 Point 14 ems	12 Point 13 ems
	9 Point 13 ems	

GENERAL INFORMATION (Continued)

HOW TO ORDER SORTS

The following table, giving the weight of each character, in its respective box as usually laid in case, will be found to be very useful when ordering sorts.

a c d h i m n o r s t u	2 pounds
b f g l p v w y	1 pound
k j q x z and all figures	6 ounces
e	3 pounds
Caps and Small Caps	6 ounces
Comma	1 pound
Period and other points	6 ounces

A pair of News Cases holds 50 pounds of type, an Italic or Job Case holds 25 pounds.

When ordering sorts to match type you already have, if possible, give name of foundry that made it, but be sure always to mail a cap "H" and a lower case "m" (as little used as possible), otherwise your order will be delayed while we write you for samples.

HOW TO ESTIMATE BODY TYPE

To estimate the quantity of solid type required for newspaper or book work, find the number of square inches to be set, and divide the same by four (4), which will give the approximate weight of matter in pounds; to which add 25 per cent. for sorts or dead letters remaining in the case.

When the matter is to be leaded the weight of the type may be reduced about one quarter, i. e. a single column of six-column folio, solid, will weigh $10\frac{3}{4}$ pounds, requiring about 13 pounds of type, while the same length column, leaded with six-to-pica leads, will contain but $7\frac{7}{8}$ pounds solid matter, requiring about 10 pounds of type to set the same.

STANDARD NEWSPAPER MEASURE

The Standard Newspaper Measure, as recognized and now in general use, is 13 ems pica. The standard of measurement of all sizes of type is the "em quad" not the letter "m."

NEWSPAPER MEASUREMENT

Table showing the number of ems of the different sizes of newspaper type in a line, the number of lines necessary to make 1000 ems, and the length in inches. Also the number of ems in the regular lengths of column.

13 EMS PICA WIDTH OF STANDARD COLUMN	5	6-POINT	7-POINT	8-POINT	9-POINT	10-POINT

When ordering Book or Newspaper Type, always state whether Italic or Leaders are wanted, as they are never sent unless specially ordered.

Spaces and Quads are not put up with Job Fonts and Borders, therefore, if you want them for any size of body, it will be necessary for you to order them separately. See prices of Job Fonts of Spaces and Quads on page 22.

IMPOSITION OF FORMS

The make-up should learn to use the measuring rule or tape measure and dividers. They are more convenient to measure with than paper, and their use is regarded as evidence of knowledge of the imposition of book forms. The dividers will enable the make-up to verify his measurements quickly. Printers' dividers cost 85 cents.

Ascertain what furniture will be required for the margins of a book form before placing it upon the stone. Time will be saved, and the work will have the appearance of order and neatness.

After a book form is imposed, tighten the quoins, and ascertain by means of a straightedge or square if the pages are of equal length and the head lines or bottom folios are exactly in line. The folios are usually the guides for hand-folding, and should receive great attention, otherwise the binder will not secure good register. For the same reason, folios should be set exactly in the middle of the width of page.

After a book form has been locked up, it should be tested for squareness with a square. Forms are liable to get twisted or bowed in locking up, especially if the chase is weak. This defect can usually be remedied by loosening the quoins on one side and tightening them on the opposite side.

TESTS OF CORRECT IMPOSITION

As a general rule, except where for convenience in folding, certain forms are imposed from the center, the lowest (first) folio of a form is placed on the lower left-hand corner. All odd folios are always at the left-hand of the make-up, as viewed from the foot.

The odd and even folios of pages which are side by side in a correctly imposed regular form will, when added together, form a total of one more than the number of pages in a signature. The first and last pages of the signature are always placed side by side—as, for instance, in a 16-page form, where folios 1 and 16 equal seventeen.

GENERAL INFORMATION (Continued)

CORRECT IMPOSITION OF LENGTHWISE CUTS AND TABLES

The correct rule is that lengthwise tables and cuts shall always read from the foot of page. When a lengthwise cut or table is on one page and the explanatory or descriptive matter on the opposite page, then the cut or table should, if possible, be placed on the page with the even folio.

MARGINS

The proper allowances for head and back margins are matters of judgment and preference to a great degree.

The head and foot margins of a *trimmed* book are usually of equal proportions, but, as the binder will almost invariably find it necessary to cut off more paper from the foot than from the head, the make-up must make sufficient allowance for this extra trim.

When the pages have running heads one-third or less shorter than the width of the page, one-half of the space occupied by the running head should be thrown into the head margin, because the white around the running head is to be considered as part of the head margin. If a folio only is used over a page, the head margin is to be calculated from the top line of the page.

The make-up must know whether a book is to be wire-stitched through the back or sewed through the fold. If wire stitched through the back, an extra allowance *additional* to the back margin required must be made a little in excess of the space used by the wire. This space varies according to the thickness of the book, but is rarely less than three-sixteenths of an inch on *each side* of the back margin, or three-eighths of an inch in the back gutters.

In forms of thirty-two pages or more it is advisable, where it is possible, to impose the pages so that the sheet may be cut and folded in signatures of half the number of pages, especially when the paper is heavy; but if the form is imposed to fold as one complete signature then it is advisable to deduct enough from the back margin of the inner sections to equal the extra space taken up by the fold of the outside sections.

In imposing forms of 12 or 24 pages, great care must be taken to get the foot and head margins of the inset to be folded in exactly right, and the head and foot margins in such forms should be as evenly divided as possible. More accurate register is obtained when the inset is cut off and folded separately.

GRIPPER MARGINS

As applied to book forms, the space between the type and the outer edge of the chase at the gripper side is the gripper margin. A gauge showing the gripper margin of each press should be obtained from the pressman. When the paper is placed in its correct position on the type form the distance between the edge of the paper and the edge of the chase should be at least half an inch less than the gripper margin, to permit the pressman to move his form into a suitable place. To make a proper allowance for gripper margin, it is often necessary to place more furniture in the foot margins on the side of the long cross-bar next the gripper than on the other side. The lowest folio of a form should be placed next the gripper edge.

PRESS POINTS

These are used in forms that are imposed for books, the sections of which are folded by machines. In 16-page forms these points are usually placed exactly 15 inches apart—7½ inches each way from the center of the first fold. The sheets are fed into the folding machine by the point holes to insure register, and the points should be placed exactly in accordance with the instructions of the bookbinder.

GENERAL INFORMATION (Continued)

HOW TO PRINT CONSECUTIVE NUMBERS

Orders to print consecutive numbers are received more or less frequently by every printing office, large or small. In the average office, to print the numbers 1 to 200 consecutively would be quite a task, and when undertaken in the ordinary way, with

A	B	C	D	E	F	G	H	I	K	L
1	11	21	31	41	51	61	71	91	91	01
2	22	32	42	52	62	72	82	92	02	12
3	33	43	53	63	73	83	93	03	13	23
4	44	54	64	74	84	94	04	14	24	34
5	55	65	75	85	95	05	15	25	35	45
6	66	76	86	96	06	16	26	36	46	56
7	77	87	97	07	17	27	37	47	57	67
8	88	98	08	18	28	38	48	58	68	78
9	99	09	19	29	39	49	59	69	79	89
0	00	10	20	30	40	50	60	70	80	90

the facilities usually at hand, the cost is so high that the customer usually concludes to get along with something else than printed numbers, and what might be a profitable job is lost to the office.

Suppose an order for two hundred reserved seat numbers from 1 to 200, six copies of each. It is not necessary to set up more than the units 1 to 0. These figures are to be set up, properly spaced,

one above the other, as shown in column A of the table annexed.

One hundred and twenty impressions are taken on strips of card and cut to the required width. This done, give the required number of units. Change the gauge pins in a manner to print the same form beside the printed figures to form the tens, as shown in column B of the table. Take twelve impressions of this form on twelve of the already printed strips. The next step is to change the form by taking the top figure (1) and place it at the bottom of column, so the next impression on a strip of the first form will read as shown in column C of the table. We print again twelve strips of the first form. This change of the top figures, 2, 3, 4, 5, 6, 7, 8, 9 and 0, respectively, is repeated eight more times, shown in the table as columns D, E, F, G, H, I, K and L. From each change twelve impressions on the printed slips containing the first form must be made. This will finish the tens, and by changing the form to ten figure 1's and again moving the pins to the left for the space-width of the type, and printing six strips of each the former changes from B to L, gives the hundreds, or a continuous run of numbers from 1 to 199 in an edition of six copies. To obtain number 200, print upon the six strips left a figure 2 to head the 00 of column B. In assorting the numbers it will be found that each six copies of the heavy type cannot be used, but this small loss in stock is compensated many times by the advantage derived from the method.

THIRD SERIES

Same as First Series; Abbreviations Omitted

We also make Rural Free Delivery logotypes consisting of the characters **RFD** cast on en set 10-point and **R F D** cast on 3 ems set 10-point, in fonts of 2 and 5 pound assortments at body rate.

The above Mailing Type—Ten Point, with abbreviations as shown, and Ten Point Condensed Clarendon—is furnished at 46 cents per pound. It is put up in 50 pound fonts and upwards, carefully proportioned. Extra sorts furnished promptly, on the shortest notice, as they may be required.

Slugs, Reglets, Leads, Zinc Galleys, and all other requisites for mailing kept constantly in stock.

We can justly recommend the *Longley Times Mailer* for addressing purposes. It is simple and compact in construction, is easily handled, and unexcelled in speed, which is only limited by the skill of the operator. An illustrated descriptive circular, giving full and concise information concerning this valuable little machine, will be cheerfully sent on application.

SIX POINT LOWELL

No handicraft receives so much attentive observation as printing. But the observation of the ordinary reader, however attentive it may be, is usually superficial and imperfect. Types are seen but not regarded; it is only the information conveyed by types that is considered. Few general readers know by name the different sizes or styles of types; fewer still could identify the types made or used by famous printers. To men whose limited time compels them to care more for the ends than the means of knowledge, this want of consideration is pardonable. Life is short, and even a studious man may be excused for neglecting typography, when English literature is so deficient in instructive technical works on this subject. Our books on typography are written for printers, and interest printers only. There is no popular treatise about book types; nothing that gives us in succinct and connected form information about their designers and makers, and that tells us why styles once popular are now obsolete. The subject is not trivial. The services that have been rendered to literature by types, and the esteem in which good printing and fine editions have always

THE failure of many early printers to make their business profitable was largely caused by their injudicious selection for publication of bulky theological writings which cost a great deal of money to print, and were salable only to a small class. It was unwisely supposed that printing would receive its great support from the ecclesiastics. With this object in view, the first printers printed almost exclusively in Latin, and generally in the expensive shape of folio, the books which could be read only by the learned, and bought only by the wealthy. The activity of the early printers is remarkable. The task of preserving the literature of the world was fairly done at a very early date. Nearly all the books printed by Gutenberg and Schœffer were in the Latin language. Whether they over-looked the fact that there was actual need for books in German, or whether they were restrained in an attempt to print in German, cannot be decided. Other publishers saw the need, and disregarded the restraint, if

IN China, letters appear to have been painted on linen and silk long before the discovery of paper. Specimens of hieroglyphical writing on linen have been found in Egyptian mummy cases. The early Arabs committed their poetry and compositions to the shoulder bones of sheep. They afterwards obtained the papyrus paper from Egypt, on which the poems called Moallaqat were written in gold letters, and after their conquests in Asia and Africa these people so speedily profited by and improved the inventions of the nations they had subdued, that parchment was manufactured in Syria, Arabia and Egypt, which in color and delicacy might vie with our modern paper. It speedily superseded the use of papyrus, and was used for a long time. The

MANY ADVANTAGES OF THE UNIVERSAL LINING SYSTEM

The exclusive use of Universal Line Type will save any amount of time and trouble when two or more different styles of type are used in a line. All our Universal Line Type will line accurately without the use of paper, the larger sizes can be used in combination with the smaller ones by using point leads and slugs. Another important feature as necessary to save time is Universal Point Set, meaning that all characters are cast to even points or a fraction

7 Point Font \$2 25

POINTS OF EXCELLENCE FOUND IN KEYSTONE TYPE

One of the most important things to consider in purchasing your new type faces is the strength and durability of the metal from which it is cast, the ordinary type metal is very soft and soon wears out, making it necessary to purchase new. Nickel-Alloy metal type will outwear that of any other type manufactured and will retain the sharp outline of the face longer than

8 Point Font \$2 25

20 A \$1 05 40 a \$1

OUR TYPE BEARS THE MARK OF THE KEYSTONE

To avoid trouble, inconvenience and delays, be sure all your type bears the mark of the Keystone as it insures the toughest and the most durable type; another advantage is the perfect alignment of all the different faces that are cast on the Universal Lining System

PRINTER OF SPECULUM MAY BE INVENTOR OF PRINTING

His workmanship, as shown in the various editions of the book, clearly proves that he had passed the long shoals of experiment, and was on the broad sea of successful practice. We can see, even without the help of the legends or chronicles, that he cut punches, made moulds and founded types of different faces and bodies; that he was successful both as a printer and publisher, compounding ink in a proper manner, and printed his types upon a press he constructed for the needs of practical typography

7 Point Font \$2 25

24 A \$1 05 48 a \$1 20

EARLY CHRONICLES OF THE DUTCH TELLS LITTLE

They are not only meagre in their recital of the more important facts that are connected with the invention, but are notoriously incorrect in their brief description of the minor details. The books themselves reveal the process by which they were printed, and are regarded as of higher authority, but it is proper that the books should be examined first to compare the statements

8 Point Font \$2 25

22 A \$1 10 42 a \$1 15

LARGE NUMBER OF THESE BOOKS WERE PRINTED

Forty-three editions of twelve different works, printed from eight faces of types, are now attributed to the unknown printer of the Speculum or his successors. In eleven works, the types resemble those of the Speculum, but the books are different as to character. They are in the form of small quarto or octavo, and are entirely destitute of illustrations

9 Point Font \$2 50

22 A \$1 20 44 a \$1 30

EIGHT FACES OF TYPE SHOW THEIR RELATION

In common features they are much alike and sometimes two faces appear in one book but they are all made on a different body, four of the faces are on bodies nearly the size of 14-point and two of them are on bodies about the size of 16-point. The modern printer is at a loss to imagine why his unknown predecessor should have

10 Point Font \$2 50

20 A \$1 20 40 a \$1 30

SPECULUM TYPES MADE FROM A MOULD

The types used at that time show that they could not have been cut on wood or metal. There is a tradition that has found its way into popular books on typography, that the first hand-moulds that were in use many years ago, were provided

OLD STYLE No. 2

Price of Complete Series, 9 Sizes, \$23.25. For Accents made see Pages 300 to 307

THE PAPER-MARKS OF THE SPECULUM REVEAL NOTHING

The paper-marks of the Speculum and of other works of the unknown printer have been repeatedly examined in the belief that they would reveal the place where and the time when the paper was manufactured. An English author who devoted the larger part of a folio volume to a review of the paper-marks of the block-books, undertook to prove from them that the Speculum must have been printed before 1440. All known copies contain a variety of dissimilar paper-marks, and it is very evident that papers bearing so great a variety of paper-marks were not made at one

7 Point Font \$2 25

24 A \$1 05 48 a \$1 20

EARLY CITY RECORDS OF THE TREASURY OF HAARLEM

The records are written on papers containing paper-marks like those of the Speculum and show that they were bought at Antwerp. Koning thinks that the Speculum and block books which are printed on the same paper, must have been printed between 1420 and 1440, and that the paper of the books was made in Brabant, he also says that the letter P stands for Philip the Good, Duke of Bergundy who reigned from 1419 to 1467; the

8 Point Font \$2 25

22 A \$1 10 42 a \$1 15

CLOSER OBSERVATION HAS ELICITED FACTS

The letter P has been found in the accounts of the Count of Holland at the Hague for the year 1837; paper bearing the same P was used by many printers of the Netherlands, by one printer in Paris, and by several printers in Germany the last quarter of the fifteenth century. It is found in paper made before and after the reign of Philip, and in

EXTRACTS FROM THE HISTORIES OF PRINTING IN AMERICA

So far as relates to the introduction of the art of Printing, and establishing the press in this section of the continent, Massachusetts claims precedence over all the other colonies. The press was erected here in the autumn of 1638; and, it was more than forty years before printing commenced in other parts of what, before the revolution, was called British America. Hitberto justice has not been done to the man, by whose agency the art was first introduced into the English colonies. Although he was one of the best, and firmest friend to New England, his name has not been banded down to us with so much publicity as were those of other distinguished characters, who were his contemporaries, and fellow laborers

MR. JESSE GLOVER WAS INTERESTED IN PRINTING

He was a worthy and wealthy dissenting churchman in England, who engaged in the business of the settlement of Massachusetts, and had been attentively pursuing such measures for its interest and prosperity as he judged would best tend to promote them. Among many other things for the benefit of the infant colony, he was very desirous of establishing a press to accommodate the business both of church and state; he contributed liberally towards a sum sufficient to purchase printing materials, and for this purpose he solicited both in England

MENTIONED IN ANCIENT RECORDS OF COLLEGE

The ancient records of Harvard college mention that "Mr. Jesse Glover gave to the College a font of Printing Letters, and some gentlemen from Amsterdam gave toward the furnishing of a Printing Press with letters of forty-nine pounds and something more." The same records give us, also, the following names as "Benefactors to the first fonts of letters for the art in Cambridge," Major Thomas Clark, Capt. James Oliver, Capt. Allen

MR. GLOVER BUYS PRINTING APPARATUS

In the year 1638, having obtained the means, he procured a good printing apparatus, and engaged a printer to accompany it in a ship bound to New England. Mr. Glover, with his family, embarked in the same vessel; but unfortunately he did not live to reach the shores of this new world. His widow

THE INVENTION OF MOVEABLE TYPES

Where, when, and by whom printing with moveable types was first practiced, it seems impossible to find any good authorities. The claims to this honor are now limited to those of Laurenz Coster of Haarlem, Faust of Mentz and Gutenberg and Mentilius of Strasburg. Prententions were also advanced in favor of Nicholas Jensen, of Venice, until it became clear

WILLIAM CASLON WAS A SKILLED DECORATIVE METAL ENGRAVER

He was the first English founder who shook the faith of his countrymen in the superiority of Dutch founders. The merit of the Caslon types was not in their novelty of design, but in their careful cutting and good founding. The beauty of uniformity, about which Tory, Jaugeon, and Moxon had written, and which they thought could be had only by strict conformity to a

22 A \$1 15 42 a \$1 10

CASLON WON PRAISES FROM FRENCH CRITICS

He was more intent on making letters readable than on making them to appear pretty; he had the wit to see that some angularity was needed to give relief to too much roundness. It must also be remembered that in

9 Point Font \$2 50

24 A \$1 25 46 a \$1 25

BLACK LETTERS WERE THE ABIDING STYLE

The English readers at that time were familiar with Black Letter, and had not entirely outgrown a liking for angles. Caslon's style retained its supremacy in England for more than fifty years. It compelled the

10 Point Font \$2 50

THE FIRST GOOD RULE FOR DRIVING A NAIL INTO THE BOARD

Is to get your eye on the nail and, similarly, the first rule for driving a fact into a man's mind is to see that fact clearly yourself. A man can't sail a catboat in a straight line unless he pick out some particular object to point at. It takes a long time to explain what you don't know. It takes a lot of deep study and a long spell of hard trying before you can learn to do anything

REVIEW OF THE BOYHOOD AND EARLY LIFE OF JAMES RUSSELL LOWELL

One cannot conceive more fortunate or charming conditions than those of the boyhood and early training of James Russell Lowell. His father, the Rev. Charles Lowell, was minister of a parish in the city of Boston for more than fifty years. Before James was born, Dr. Lowell had moved his residence to Cambridge, to the home his children afterwards called Elmwood. So much of Mr. Lowell's poetry refers to this beautiful place, as beautiful now as it was then, that even far-away readers will feel a personal interest in it. The house, not greatly changed in the last century, was one of the Cambridge houses deserted by the Tory refugees at the time of the revolution. On the steps of this very house, Thomas Oliver, who resided there

8 Point Font \$2 25

30 A \$1 10 60 a \$1 15

HE MADE HIS FIRST ADDRESS UNDER THE LYCEUM SYSTEM

James Russell Lowell spoke with absolute simplicity, with entire ease, and he really enjoyed public speaking. It was near the close of the first quarter of the century that what was called the "Lyceum System" came into being in New England. It worked wonderfully well under the original plans. The institution, as it may be called, or the habit, if you please, of lecturing and listening to lectures, was formed again, probably never to be a

SOME CAUSES WHY THE COMPOSING ROOM DOES NOT PAY

Do you wonder why your composing room does not seem to pay? A few suggestions as to the course to be pursued in the permanent eradication of this discrepancy may be of inestimable value to you. Stop and consider some of the whys and wherefores. To make money you must necessarily spend money. In the first place is your material of modern manufacture? It should be. Why not replace antiquated and worn-out faces with the popular faces of the day? Quality of faces is what counts, not the quantity. A few well-selected faces, and plenty of letter, is of more value in the composing-room than many faces, and small quantities, chosen at random

8 Point Font \$2 25

23 A \$1 15 44 a \$1 10

WORN-OUT TYPE EATS PROFIT AND PRINCIPAL

The time wasted in making ready worn-out letters a few times in a day will amount to the price of a font of type in less time than it takes to tell about it. Are the cases in such a condition that when the compositor goes to them he is compelled to hunt for sorts? Five minutes wasted looking for sorts for every other line amounts to considerable during the day, the more men the more time wasted, and in the course of a year the aggregate is almost beyond conception. Turned sorts are the bugaboo of every one handling the form: the compositor who sets them, the stone hand who locks them up

SPREAD OF PRINTING IN CENTRAL AND NORTHERN EUROPE

When two rival printing offices had been established at Mentz it was no longer possible to keep secret the processes. Every printer who handled the types and every goldsmith who helped to make the tools must have felt a weakening of the obligation of secrecy. The sack of Mentz was a greater misfortune, for it dissolved all obligations and sent the printers to other cities to found new offices. Not one of these printers has told us when and how he began to print on his own account. All that is known about the introduction of printing in many of the large cities has thus been gathered from the dates of books and the chance allusions from as far back as

8 Point Font \$2 25

25 A \$1 15 50 a \$1 10

THE TOOLS AND USAGES OF THE EARLY PRINTERS

The first processes in the practice of typography—the cutting of punches and making of moulds, demanded a degree of skill in the handling of tools and of experience in the working of metal rarely found in any man who undertook to learn the art of printing. They were never regarded as proper branches of the printer's trade, but were, from the beginning, set aside as kinds of work which could be properly done by the goldsmith only. Jenson, Cennini, Sweinheim and Veldener were the most progressive printers of the fifteenth century, who had the preliminary education that would warrant them to prosper in those

CHARLEMAGNE'S EDUCATIONAL POLICY

Flac. Alcium, an Englishman and a graduate of the Anglo-Saxon schools, the teacher and adviser of Charlemagne, was authorized by the great emperor to institute a policy which would multiply books and disseminate knowledge. It was ordered that every abbot, bishop and count should keep in permanent employment a qualified copyist who must write correctly, using Roman letters only, and that every monastic institution should maintain a good

12 Point Font \$2 75

THE COPYISTS OF THE MIDDLE AGES

May be properly divided into two classes: the class that considered copying an irksome duty and that did its work mechanically and badly; the class that treated book-making as a purely artistic occupation, and gave the most time and care to ornamentation. The book-makers who made authentic copies have

IF YOU ARE INTERESTED IN AMERICAN PRINTERS' IDEAS

Make yourself wise in the practical and money-making factor of your printing business. It is very important to be on the lookout for new Display Type Faces as they appear on the market, for up-to-dateness helps your business. Be sure also, that the type you purchase is on the Keystone Universal Lining System which has been adopted by art printers the world over as the most perfect of lining system. It would be well to consider the Ben. Franklin Series which is one of the most popular faces of the present time; made on Universal Line and its wearing qualities are unequaled as it is made from Nickel-Alloy Metal, the best material for the purpose ever invented; the types retaining their sharp outline longer than those made from other metals. It is better for

8 Point Font \$2 25

22 A \$1 10 40 a \$1 15

SPARKS FROM OUR FIRST PRINTER, BEN. FRANKLIN

Another cause for the large sale of the early issues of the Almanack was, without question, due to the controversies with his brother Philomaths, which Franklin originated by his jocose remarks upon them in the prefaces of Poor Richard. Now and then with delicious humor and satire, Mr. Saunders, in different issues of the Almanack, gravely predicts the death of one of his rivals, Titan Leeds, and the reconciliation of a second, John Jerman. In this way they could not draw from the stars Franklin's purpose, and they all fell into his trap, and in the prefaces to their respective issues where they replied to him

10 Point Font \$2 50

16 A \$1 15 32 a \$1 35

POPULAR SAYINGS OF POOR RICHARD

It is hardly necessary to make known or state that Franklin did not originate all the "Sayings of Poor Richard." He himself tells us that they were "the wisdom of many ages and nations," and those who are familiar with Bacon and Rochefoucauld as well as others, will recognize old friends in some of these sayings, yet with but few exceptions these maxims and aphorisms had been filtered through Franklin's

IN THESE DAYS WHEN TYPEFOUNDER AND PRINTER

Have Unrestricted Liberty, it is indeed interesting to contrast our present conditions with those of the Crafts in the Earlier Centuries, when the Art of Printing was regarded with suspicion by Tyrannical Governments, and when books were Printed Clandestinely, or if at all. These conditions of affairs had been going on for years until the climax reached about the middle of the Seventeenth Century

BUY THE POPULAR STYLES OF THE DAY WHEN IN NEED OF NEW TYPE

The Niagara Series is one of the Popular Faces distinctively in a class by itself; as a Display Letter for Advertisements, either in Combination with a Body Letter or used as a Series, it stands out without a peer. It is a Clean, Neat and Attractive Face that can be utilized for all classes of work where an Italic Job Letter is Appropriate and there are many. A careful glance at the Style of this Face will give you an idea of the varied uses to which it can be put. It is one of the best Nickel-Alloy, Universal Line Types now on the market, so it is well for all Printers who are in this business for good profits

MONEY MAKING MODERN TYPOGRAPHICAL IDEAS

Among the many inventions in the casting of type since the time of Gutenberg and his colleagues, the Point System pre-eminently leads the van. Prior to its introduction, each foundry had its own system of measuring, causing untold trouble to the compositor. Now all type, from the smallest to the largest sizes, is cast on this system. Next in importance comes the Keystone Type Foundry's Universal Line, whereby the Compositors earn larger profits for their employers by saving time in justification and thereby enlarging the output of the composing

8 Point Font \$2 25

21 A \$1 15 40 a \$1 10

TEDIOUS JUSTIFICATIONS ARE NOW OVER

And the indispensable friend of our olden time "prints" now hangs disconsolately upon a nail. Rusty and neglected, the old Print Shop Scissors cast envious glances towards the cases of Keystone Universal Line Type; and well they may, for the Universal Line has certainly worked them out of their job. There is no longer need for the one time familiar strips of paper and cardboard or

BUYING ATTRACTIVE AND ARTISTIC TYPE FACES

The profit making part of the Art of Printing is much enhanced by the use of such faces made of the best wearing material. The Keystone Type Foundry Faces always have these very qualities and talk right out in a way that attracts the greatest attention, and makes the largest profit for their users. Keystone Nickel-Alloy, Universal Line Type are in a class by themselves, in up-to-dateness, style and wearing quality. Knowing Printers the world over are aware of this and it is an apt slogan that when once a user of Keystone Type always a user

COMPETITION AN AID TO HIM WHO WOULD SUCCEED

Nothing develops strong qualities like opposition, for you know a kite always rises against the wind, not with it, and no man ever worked his way in a dead calm. Every courageous man knows this, and courage is just as necessary in the successful pursuit of business as in battle. Grim determination is a powerful factor in the making and keeping of a paying business. One has to keep pegging away if he wishes to reach

BUSINESS IS LIKE ORE—YOU HAVE TO DIG FOR IT

Nuggets are usually anchored fast in the hard hillside, and it takes a lot of good stiff pick-and-shovel work to loosen them up so that they can be added to your pile. Success usually comes to those who have grit and determination, and who are not afraid to hustle. The man who waits for things to turn often turns up himself in the

8 Point Font \$2 25

16 A \$1 05 32 a \$1 20

OPPORTUNITY WILL KNOCK ONCE

It is said that Opportunity will knock at least once at every man's door, but you should not expect the panels to be kicked in. Better leave the door a little ajar so that you can get her quickly, before she has time to pass you by, or else get out and hustle until

9 Point Font \$2 50

17 A \$1 25 34 a \$1 25

BUSINESS LIKE HUMAN NATURE

There are a great many more twists and knots in it than show on the surface. Get wise, and take the knots and twists as they come, undoing them carefully, but with true determination. Keep on the sunny side, for a cheerful disposition carries

COLUMBUS FIRST CONCEIVED THE IDEA OF A NEW WORLD

It was the intrepid Italian, who thought the world was round instead of flat, and who sailed off into the unknown sea in the expectation to discover a new hemisphere of two continents. Encouraged by the Spanish Crown in the great undertaking, he set sail on August 3, 1492, and for many days he roamed the storm tossed Atlantic, landing at last, he discovered our great country at that

LIKENESS OF AMERICAN GIRL ON PENNIES

Despite the fact that the crown of eagle feathers is distinctly Indian, it is the head of a Philadelphia girl. Sarah Longacre was quite young when her father lived in the neighborhood of Eighth and Pine streets, where occurred the curious incident that has been perpetuated on every penny issued by the United States mints. From those early days down to the present time

8 Point Font \$2 25

17 A \$1 10 32 a \$1 15

PICTURE COPIED MILLIONS OF TIMES

It is safe to say that her picture has been copied more in the past forty-seven years, and been more widely spread than that of any other American woman. Millions upon millions of times each year it is struck off in glistening copper, which soon loses its shine, yet goes on playing the most important part of all pictures, when you start to

10 Point Font \$2 50

16 A \$1 20 30 a \$1 30

INDIAN CHIEF STARTED IDEA

When Sarah was a young girl, with long hair and a face of uncommon beauty, her father was chief engraver in the mint here. At about this time a delegation of Indian chiefs came from the great Northwest to smoke the pipe of peace

12 Point Font \$2 75

14 A \$1 35 26 a \$1 40

CHIEFS VISITED THE MINT

While these Indians were here they were taken to see how the white man made his wampum. There they met Mr. Longacre, who explained everything to them, ending

COORNHERT'S PRINTING NOTICE IN HAARLEM

It was about the Fifteenth Century when Jan Van Zuren and Dierick Coornhert, with other partners, set up a printing office in Haarlem. Van Zuren was a native and burgomaster of the town of Amsterdam; Coornhert, who was a notary and an engraver, is said to have been the instructor of the famous engraver Goltzius. Their first book printed was an edition of Cicero de

Philadelphia, March 6, 1906

MR. PRINTER.

Dear Sir:—We have the pleasure of calling your attention to this useful Ten Point "Elite" Typewriter, used by Messrs. Wyckoff, Seamans & Benedict on their celebrated Improved Typewriting Machine. The matrices from which this face was cast were made directly from the dies used on their machine, and which were kindly furnished us by them for this purpose.

The great advantage of this letter is in its size, it being narrower than any yet made.

10-POINT ELITE TYPEWRITER

 100 a, separately 4.55
 Special characters, / % # — " with
 each font, cast on same thickness as
 letters and spaces.

Very truly yours,

KEYSTONE TYPE FOUNDRY.

SIX POINT GERMAN

In Deutschland war die spitze Schwarzschrift stets der bevorzugte Stil für Kirchenbücher. Je stattlicher das Buch, desto ernster und erhabener war der Charakter desselben. Vielleicht eine der schönsten Arten dieser Schriftgattung in einem gedruckten Buche war in der Bamberger Botschaft vom Jahre 1481 enthalten, dessen Textbuchstaben dreiviertel Zoll hoch waren. Für diejenigen Bücher, welche speziell zum Lesen für Laien gemacht wurden, eine einfachere Form der Schwarzschrift stand in großer Gunst. Ein gutes Exemplar derselben, welches Gutenberg zugeschrieben wird, ist im Catholicon vom Jahre 1460 zu finden. Die gleiche Form ist in dem Ablaghbrief von 1454, in der Schöpfer'schen Ausgabe des Cicero (1465) und in vielen der populären Bücher der ersten deutschen Buchdrucker enthalten. Diese Schrift hat keinen bestimmten Namen; französische Bibliographen nannten sie Lettre de somme, die englischen Semi-Gothic. Wir geben ihr den Namen Round Gothic, um sie von der Pointed Gothic zu unterscheiden. Weber die eine, noch die andere dieser Formen genügte den Druckern und Lesern des 15. Jahrhunderts. Es machte sich ein Verlangen nach größerer Aus schmückung und Verschiedenheit der Schrift geltend. Erhard Reisch scheint mit seiner Schrift im Jahre 1486 den ersten Schritt in der Einführung einer Serie neuer Formen gethan zu haben, welche schließlich zum allgemeinen Gebrauch der modernen deutschen Schrift führten. Die Schrift im „Theuerbant,“ eines im Jahre 1517 bei Schönsperger in Nürnberg gedruckten Gedichtes, kann als das Motiv, wenn nicht als Modell, für die unter dem Namen German Text bekannte Schrift betrachtet werden. Der moderne Geschnad weigerte sich jedoch, diese Schrift als eine Verbesserung der alten, einfacheren Form anzuerkennen, während die Eigenheiten derselben nach und nach von allen deutschen Buchdruckern acceptirt wurden. Zieht man die Angularität der modernen deutschen Schrift in Betracht, so muß man gestehen, daß ihr Name: „Fraktur“ sehr gut gewählt ist. Die Round Gothic, modifizirt und vereinfacht, findet bei deutschen Buchdruckern unter dem Namen „Schwabacher“ ausgiebigen Gebrauch.

Die Popularität der deutschen Form der Buchstaben wurde in Deutschland in keiner Weise beeinträchtigt durch die Einführung der römischen Buchstaben anderwärts. Gebildete Leser zogen allerdings die römischen Buchstaben vor; dem Volke im Allgemeinen, welches um diese Zeit anfang, Bücher zu kaufen, waren sie durchaus nicht genehm. In allen civilisirten Ländern (Italien ausgenommen) waren die geschriebenen Textbücher in schwarzer, gothischer Schrift, ebenso alle frühen Gebet- und Andachts-Bücher. Für diejenigen Leser, welche an Gothisch gewöhnt waren, war es keine Leichtigkeit, die römische Schrift zu lesen. Dieses Vorurtheil existirt noch heute. Bismarck, der große deutsche Staatsmann, gab vor nicht langer Zeit seiner Abneigung gegen römische Schrift in deutschen Büchern Ausdruck. Er erzählt, daß er, mit der Uhr in der Hand, die Zeit notirte, welche er zum Lesen je einer gedruckten Seite in römischen und deutschen Buchstaben gebrauchte. Er fand, daß das Lesen der römischen Seite seine Aufmerksamkeit in höherem Maße tagirte, als die deutsche, und auch mehr Zeit in Anspruch nahm.

Nachdem zu Ende des vorigen Jahrhunderts der Buchdrucker-Pressenbau einen ganz namhaften Aufschwung genommen hatte, so daß eine Erfindung auf diesem Gebiete die andere verdrängte, trat mit dem Anfang dieses Jahrhunderts ein Ereigniß ein, welches alle jene Erfindungen tief in den Schatten stellte und dazu ausersehen war, einen Umschwung auf dem Gebiete der Buchdruckerkunst hervorzurufen, wie er bis dahin seit den Tagen Johann Gutenbergs nicht erlebt worden war, so daß von da ab eigentlich eine neue Ära auf diesem Felde datirt. Dies Ereigniß war die Erfindung der Cylinder- und Schnellpresse durch unsere Landsleute König und Bauer. Im Jahre 1869 wurde in der von diesen beiden Männern in Kloster-Oberzell, bei Würzburg, gegründeten Fabrik die tausendste Presse fertiggestellt, und entnehmen wir den Mittheilungen über das Leben der beiden Erfinder, die

BRASS TYPE

We are exclusive agents in the following States for the Brass Type, Borders and Ornaments made by the *Missouri Brass Type Foundry Co.*, of Saint Louis, Mo.: Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, Pennsylvania, New Jersey, Maryland, District of Columbia, Delaware, Virginia, West Virginia, North and South Carolina, Georgia, Florida and on the Pacific Coast. Specimen Book showing faces and prices will be sent on application.

Our Brass Type faces are mainly of plain, substantial, durable character, and will stand the heat and pressure required in book-binding, and the wear and rough handling encountered in printing on wood, leather, cloth and other hard surfaces. The metal used in its manufacture is the hardest and best quality. Especial attention is called to the deep counters which are essential in brass type to produce good work. Our Brass Type is smoothly finished, uniform in height and good alignment. Our large assortment of faces will meet almost every requirement.

A small assortment of spaces and quads accompany each font of Brass Type.

Movable accents will be supplied to order for all our Brass Type faces. They are easily adjustable to meet all requirements.

Cap fonts of Brass Type contain 100 types properly assorted. Cap and lower case or cap and small cap fonts contain 175 types.

Our Brass Type and Borders are made any height from 1-4 inch high to 1-32 inch above type height, but are furnished regular height of type unless otherwise ordered.

Those accustomed to using the rough, uneven, poorly finished Brass Type from other manufacturers will be delighted with our superior goods. We invite you to compare our Brass Type with any other.

We are generally able to fill all orders for Brass Type with reasonable promptness, but special faces which must be cast to order take a little more time, owing to the necessarily slow process of manufacture.

As the manner and cost of manufacturing Brass Type, and time required cannot be compared with metal type, it is necessarily more expensive, but it should be remembered that it is much more durable; one font of Brass Type will outlast many fonts of metal type.

Brass Type can be used economically and with best results by Bookbinders, Badge Makers, Box Makers, Advertising Novelty Manufacturers and for embossing, stamping, printing on wood, cloth, leather and other hard surfaces. It can be furnished almost any size and height, and is hard enough to stand severe usage.

Job Face Accents

The following table shows all job faces for which accents are made, and when the Key number is compared with the Key on pages 304 to 307 the exact characters made for each size of the face designated can readily be found. On page 308 will be found a table showing accented letters required for 13 different languages.

Key for Accents

To find what accents are made for any type manufactured by us refer to the four preceding pages: find the name, size and key number of the type wanted, then find the corresponding number on the following pages, and the accents as designated after that number are all the characters we make for that particular size and face.

1. á é í ó ú ä ö ü ã õ ñ ç Ñ
2. á é í ó ú ä ö ü ã õ ñ ç
3. á é í ó ú ñ Ñ

SCHEME: Fonts of Job Type Accents are approximately 10 per cent. of the weight and price of Job Fonts of letter. They contain an equal number of each accent made for the face ordered. See pages 300 to 307 for accents made.

Sorts of Accents for Job or Body Type are sold at the same price per pound as the type, but with a minimum charge of 35 cents.

Figure Fonts

Fonts of Figures including or excluding dollar marks, periods and lower case c (or cent mark when made,) put up in 5 pound assortments or over, and sold at the prices shown. In addition to those here shown, figures for any size or series in this book can be furnished in above quantity at the regular pound price for the type. For Body Type Figures see Body Type specimen pages.

TITLE LINE FIGURES: The figures here shown, above 10 point, can be supplied at regular prices for the respective bodies furnished, on Universal Title Line and will be cast (where made) as follows: 12 point on 10 point; 14 on 12, 16 on 14, 18 on 16, 20 on 18, 24 on 20, 30 on 24, 36 on 30, 42 on 36, 48 on 42, 54 on 48, 60 on 54, 72 on 60.

ELECTROTYPED RUNNING TITLES AND DATE LINES FOR NEWSPAPERS

For such lines when made from 10-point Half Title, there will be no extra charge for composition. If made from any other type, customer buys the font at regular list price and prevailing discounts, with \$1.00 net added for laying the type, setting the lines and repacking the type, which will then be sent to the customer with the electros, for which the following charges will be made:

Name of paper, 4 words or less, each	\$0 25
Each day of week	0 15
Each month of year	0 15
Each "Vol."	0 15
Each "No."	0 15
Each year "1906" or "190"	0 15
Each single date, such as "Scranton, Pa."	0 25

Periods, commas or spaces will be cast attached to electros when so ordered without extra charge.

ELECTROTYPED DATE LINES

Prices are for any City as per style below. Length of dotted line about 9 picas. Any face in the book can be selected at following prices:

Up to and including 12-point	50c each
14 to 18-point inclusive	60c each
20 to 36-point inclusive	75c each

BRASS RULES

See page 505 to 512 for style of faces, etc.

Hereafter all Brass Rule will be sold only by the Foot, Piece or Standard Labor Saving Fonts. The former plan of selling by the pound has been entirely abandoned.

In extending the prices of cut or strip rules, count fraction of cent as full cent. Minimum charge for cut rule in one order is 40 cents, list.

All charges for Brass Rule are subject to the prevailing discounts.

STRIP RULE, PRICES PER FOOT

These prices are for plain rule (one body and one face ordered at one time) which includes Scoring, Single Parallel Lined (Dotted and Hyphen, the face of which is not more than 1-point wide), regular Wave Rule, 3-point and under, full face Rugged Rule and full face Rule, all other is Fancy Rule, to obtain the price of which add 20 per cent. to the following table. For Beveled Linotype Column Rule add 40 per cent. using the larger end of the body as a basis. For Brass Perforating Rule add 50 per cent. to the following table:

POINT	1 FOOT PRICE	NO. FEET	PRICE	NO. FEET	PRICE	NO. FEET	PRICE	NO. FEET	PRICE
1	\$0 05	200	\$0 04½	400	\$0 04½	1000	\$0 04½	2000	\$0 04

BRASS RULE, LABOR SAVING FONTS

Miters are NOT included in any fonts. For prices of miters see table following labor saving fonts.

The reduced prices in the labor saving font table on next page are for the particular schemes shown on pages 493 to 496 inclusive. The fonts cannot be altered, added to or subtracted from in any manner. All rule cut to or put up by any other scheme will be charged for in accordance with the prices in Tables H and I.

All other bodies, not listed herein, are so seldom called for that fonts are not carried in stock, and will be made up to order only at prices in Tables H and I.

BRASS RULE INFORMATION, (Cont'd)

50 Pound	80 00	70 00	62 50	57 50	57 50	55 00	55 00	55 00	52 50
100 Pound	155 00	135 00	120 00	110 00	110 00	105 00	105 00	100 00	100 00

ODD SIZE SCHEMES

Odd size schemes may be put up out of any two of the following schemes: thus a 30 pound font may be made out of a 25 and 5 pound font; 20 and 10; or two 15 pound fonts; but *it may not* be put up out of a 25, 3 and 2 pound fonts. Such fonts will be charged at the rate of the next smaller font. In the above case (30 lbs. made up of two fonts) divide the cost of the 25 pound font by 25 and multiply by 30. If a 5 pound font were made up of a 1 and a 4, the combined price of the two fonts will be charged.

FONTS OF MITERS—TABLE D

Standard Labor Saving Fonts do not contain miters; they are put up and sold separately in fonts at the following prices and contain the number of sets as noted. A "set" of miters consists of 4 right and 4 left miters.

BODY	No. SETS	PRICE	BODY	No. SETS	PRICE
1 Pt.	2 sets each 2½ and 5 ems	\$0 50	6 Pt.	2 sets 2½ and 1 of 5 ems	\$0 50
1½	2 sets each 2½ and 5 ems	50	7	2 sets 2½ and 1 of 5 ems	50
2	2 sets each 2½ and 5 ems	50	8	2 sets 2½ and 1 of 5 ems	50
3	2 sets each 2½ and 5 ems	50	9	1 set 2½ and 1 of 5 ems	50
4	2 sets each 2½ and 5 ems	50	10	1 set 2½ and 1 of 5 ems	50
5	2 sets 2½ and 1 of 5 ems	50	11	1 set 2½ and 1 of 5 ems	50
5½	2 sets 2½ and 1 of 5 ems	50	12	1 set 2½ and 1 of 5 ems	50

Larger than 12-point figure price per piece according to Tables H and I (page 491) plus charges for mitering in Table F on next page.

SINGLE SETS OF MITERS—TABLE E

Miters will be sold in single sets from 1 to 6 ems in length, (4 each, right and left) at the following prices per set. Price includes rule and mitering.

BODY	PRICE PER SET	BODY	PRICE PER SET	BODY	PRICE PER SET
1 Point	\$0 15	5 Point	\$0 25	9 Point	\$0 40
1½ Point	15	5½ Point	25	10 Point	40
2 Point	15	6 Point	25	11 Point	40
3 Point	15	7 Point	25	12 Point	40
4 Point	15	8 Point	25		

BRASS RULE INFORMATION, (Cont'd)

PAGE RULE MITERS—TABLE F

Miters over 6 ems are sold by the "price per piece" as per Tables H and I for the length of rule used, plus the following list prices per page or set of miters:

PAGES	1 TO 5 1-2-POINT	8 TO 12-POINT	14 TO 16-POINT	OVER 16-POINT
1 to 8	\$0 12 per page	\$0 14 per page	\$0 16 per page	\$0 20 per page
9 to 16	11 per page	13 per page	15 per page	19 per page
17 to 32	10 per page	12 per page	14 per page	18 per page
Over 32	09 per page	11 per page	13 per page	17 per page

LABOR SAVING FONTS OF BRASS LEADERS

Made in two styles. Style 1, a fine dot; style 5, a regular hyphen

SIZE FONT	8-POINT	8-POINT	10-POINT	12-POINT
1 Pound	\$1 70	\$1 60	\$1 50	\$1 40
2 Pound	3 40	3 20	3 00	2 80
3 Pound	4 95	4 65	4 50	4 05
4 Pound	6 40	6 00	5 80	5 20
5 Pound	7 75	7 25	7 00	6 50
10 Pound	14 00	13 50	13 00	12 00
15 Pound	21 00	19 50	18 75	18 00
20 Pound	27 00	25 00	24 00	23 00
25 Pound	33 75	31 25	30 00	28 75
50 Pound	65 00	60 00	57 50	55 00
100 Pound	125 00	115 00	110 00	105 00

Sorts are sold per 100 pieces at prices given in Table H. When ordering leaders to line with any type not on Universal Line, be sure to send sample type "H" and "m" and state whether dot or hyphen leaders are desired. See schemes for labor saving fonts on pages 496 and 497.

SPACE RULE FONTS—TABLE K

Consisting of all faces and bodies from 1 to 12 point containing an equal number of each length from 1 em pica to 4 ems pica inclusive by $\frac{1}{2}$ ems pica. Fonts weigh approximately, one pound.

BODY	NO. PIECES EACH LENGTH	PER FONT	BODY	NO. PIECES EACH LENGTH	PER FONT
1	90	\$4 50	6	15	\$2 10
1½	59	3 40	7	13	2 10
2	45	2 85	8	11	2 00
3	30	2 50	9	10	2 00
4	22	2 30	10	9	1 90
5	18	2 25	11	8	1 80
5½	16	2 15	12	7	1 70

PRICE LIST OF CUT RULE

All rule, except regular Labor Saving Fonts put up and carried in stock, will be charged for according to the following tables. These prices are for plain rule. The price of fancy rule is obtained by adding 20 per cent. to these schedules. For lino-type column rule add 40 per cent. using the larger end of body as a basis. For brass perforating rule add 50 per cent. See tables H and I on following page. For any length between those given in the tables, the price of the next longer piece will be charged. For larger bodies and longer pieces send for prices.

BRASS RULE INFORMATION, (Cont'd)

QUANTITY DISCOUNTS ON CUT RULE

The prices in Tables H and I are subject to the following quantity discounts in addition to the regular discounts, if order for rule of **one body and face ordered at one time** equals or exceeds (exclusive of notching charges.)

\$ 10 00	The quantity discount is	5 per cent.
20 00	" " " "	10 per cent.
50 00	" " " "	15 per cent.
100 00	" " " "	20 per cent.

This discount to be deducted before the regular discount on brass rule. Notching charges are NOT subject to the quantity discount, but are subject to the regular discount only. This quantity discount applies only to the above **Cut Rule**.

For nicking at one end or bottom add 10 cents per pound; at both ends, or one end and the bottom, 20 cents per pound based on the number of ems in the following table:

Ems, Inches or Feet to Pound

POINT	NUMBER OF EMS TO POUND	NUMBER OF INCHES TO POUND	NUMBER OF FEET TO POUND	POINT	NUMBER OF EMS TO POUND	NUMBER OF INCHES TO POUND	NUMBER OF FEET TO POUND
1	1548	258	21 5	6	258	43	36
1½	1290	215	17 5	7	221	36½	30
1¾	1032	172	14 3	8	194	32½	27
2	774	129	10 75	9	172	28½	24
3	516	86	7 2	10	155	25½	22
4	387	64½	5 4	11	141	23½	19
5	310	51¾	4 3	12	129	21½	18
5½	282	47	3 9	18	86	14½	12

SPECIAL CUTTING

If customer sends in strip rule to be cut, the strip rule will be credited at the prevailing prices for strip rule and then the cut rule will be charged for the respective lengths in the finished order at the prices per piece in Tables H and I.

If customer sends in old rule (or new rule in other than full strips) the cut rule will be charged for the respective lengths in the finished order at the prices per piece in Tables H and I.

Then figure out the number of ems in the finished order in all pieces up to 10 ems; the number of inches in pieces 10½ ems and longer; reduce the same to feet (6 ems to the inch—12 inches to the foot) and figure out the total price at the regular one foot rate. Deduct this amount from the total "price per piece" charges, and the difference will be the charge for cutting, which is subject to the regular rule discount, but not the quantity discount, Example:

Customer sends in a lot of rule to be cut down to labor saving lengths. After same is cut the prices in the finished order are as follows:

FOUR POINT RULE

	RATE	TOTAL	EMS	INCHES	FEET
8 ems, 250 pieces	\$3 00	\$7 50	2000		
9 ems, 250 pieces	3 30	8 25	2250		
10 ems, 250 pieces	3 60	9 00	2500—1125		
11 and 12 ems, 100 pieces each, 200, at	04	8 00		400	
13, 14 and 15 ems, 100 pieces each, 300, at	05	15 00		750	
16, 17 and 18 ems, 100 pieces each, 300, at	5½	17 50		900	
Total Piece Price		\$65 25		3175	264½
Credit for old rule		52 90			
Charge for cutting rule		\$12 35			

This charge of **\$12.35** is subject to the regular discount on brass rule, but NOT to the Quantity discount of 5 per cent.

BRASS HEAD RULES

If Head Rules are to be nicked for Special Column Rules, time for cutting nicks will be charged extra. For prices and style of faces most commonly used see page 522.

BRASS ADVERTISING OR CROSS RULES

For prices and styles of faces made and most commonly used see page 523; although any face selected from our regular rules can be cut to order. In ordering give width of column and thickness of column rules used.

BRASS RULE INFORMATION, (Cont'd)

BRASS BRACES

For prices and styles see page 526.

BRASS DASHES

For prices and styles see pages 524 and 525.

BRASS DASH RULES

Prices and styles of faces generally used shown on page 523.

BRASS COLUMN RULES

Unless otherwise ordered, our No. 510 Rule is the STYLE OF FACE furnished for Column Rules. See illustration on next page showing styles most commonly used. The prices following are for Column Rules, style 0.

SIZE	INCHES	6-POINT	7-POINT	8-POINT	9-POINT	10-POINT
4-Column	13 $\frac{3}{4}$	\$0 38	\$0 44	\$0 50	\$0 56	\$0 62
5-Column	17 $\frac{3}{4}$	48	56	63	71	78
6-Column	19 $\frac{3}{4}$	53	62	70	78	87
7-Column	21 $\frac{3}{4}$	58	68	77	86	95
8-Column	23 $\frac{3}{4}$	63	73	83	93	1 03
9-Column	25 $\frac{3}{4}$	69	79	90	1 01	1 12

For Plain Column Rules without notch, as per Style 0, deduct 2 cents from these prices.

For Style 1 add 8 cents to the above prices; Style 2 add 18 cents; Styles 3 and 4 add 13 cents.

For prices on other bodies and lengths see Table I to which must be added 2 cents each for notching like Style 0; 10 cents like Style 1; 20 cents like Style 2; 15 cent like Styles 3 and 4.

Prices for all Column Rules are figured on the basis of length over all.

BEVELED LINOTYPE COLUMN RULES

Prices below are for Rules notched as per Style 0.

5 x 6 Linotype Column Rule

SIZE	5 X 6 POINT	6 X 7 POINT	7 X 8 POINT
6-Column	\$0 74	\$0 86	\$0 98
7-Column	81	95	1 07
8-Column	88	1 02	1 16

For other sizes and lengths, figure according to Tables H and I for the largest body (5 x 6 figures as 6-point). Add 40 per cent. for beveling to which must be added for the different styles the same prices as given for regular Column Rules.

BRASS AND METAL FOOT SLUGS

	SINGLE COLUMN	DOUBLE COLUMN
Brass, 12 Point	\$0 15	\$0 25
Brass, 18 Point	20	30
Brass, 24 Point	25	35
Metal, 12 Point	04	06
Metal, 18 Point	05	07
Metal, 24 Point	06	08

BRASS RULE INFORMATION, (Cont'd)

ILLUSTRATING STYLES OF NICKED COLUMN RULES MOST COMMONLY USED

For prices see preceding page. For instructions in ordering see following page

BRASS RULE INFORMATION, (Cont'd)

INSTRUCTIONS FOR ORDERING BRASS COLUMN OR HEAD RULES

Style No. 0. Give quantity, size of body, and length of face. The shank on this style is always made as long as the body of the rule, viz: on 6-point rule, the shank is 6-points; on 8-point, 8-points, etc.

Style No. 1. Give quantity, size of body and length of face, and length and height of shank. This is the style rule most generally used for stereotyping.

Style No. 2. Give quantity, size of body, and length of face; length and height of shank, height of head nick and length and height of nib.

Style No. 3. Give quantity, size of body and length of face: length and height of shank and length and height of nib.

Style No. 4. Give quantity, size of body and length of face; length and height of shank; height of head-nick and length and height of nib.

Head Rules. Give quantity, length, number of face, width of column and style number. For styles most commonly used, see page 523.

Labor-Saving Column Rules. When Column Rules are ordered cut Labor Saving, state whether any pieces are to be nicked and in what style. Unless otherwise ordered, Labor-Saving Column Rules will be cut to multiples of 6 and 12-point.

BRASS OCTAGON CORNERS

QUANTITY	12 AND 18-POINT BODY 1 TO 12-POINT FACE IN SETS OF FOUR	24-POINT BODY 1 TO 12-POINT FACE IN SETS OF FOUR
1 to 16	\$0 35	\$0 50
17 to 32	34	49
33 to 48	33	48
49 to 64	32	47
65 to 80	31	46
81 or over	30	45

The quantity prices allowed only on quantities of one style corner.
For style of Brass Octagon Corners see page 521.

BRASS ROUND OR SQUARE CORNERS

QUANTITY	12-POINT IN SETS OF FOUR	18-POINT IN SETS OF FOUR	24-POINT IN SETS OF FOUR

BRASS OR COPPER THIN SPACES

Cut to order with the size of each space stamped upon it

5 Point, per pound	\$2 50	12 Point	} per pound	\$1 40
5½ Point, per pound	2 25	14 Point		
6 Point, per pound	2 00	16 Point		
7 Point, per pound	1 85	18 Point	} per pound	1 35
8 Point, per pound	1 75	20 Point		
9 Point, per pound	1 65	24 Point		
10 Point, per pound	1 55	30 Point		
11 Point, per pound	1 45	36 Point	} per pound	1 30
		42 Point & larger		

Please note that Copper Thin Spaces are intended for use as Spaces only. They are not exactly ½-point, and cannot be used as leads to justify different sizes of type. They are intended simply for spaces to take the place of hair spaces in fonts. See font prices on page 503.

THIN SPACE INFORMATION

PRICES OF KEYSTONE LEADS AND THIN SPACES

These prices do not include cases. (See page 504.)

- Font "E"**—1-point Brass Justifying Leads, case lot of 2 pounds, 11 ounces, cut in the following lengths:—6, 8, 10, 12, 14, 16, 18, 20, 24, 30, 36, 42, 48, 54, 60, 66 and 72-points, and from 7 to 16 ems pica inclusive \$4.00
- Font "F"**—2-point Metal Justifying Leads, case lot of 3 pounds, 6 ounces, cut in the same lengths as Font E 1.25
- Font "G"**—½-point Copper Thin Spaces, half case or section lot of 11 ounces, cut in the following lengths:—6, 7, 8, 9, 10, 11, 12, 14, 16, 18, 20, 24, 30, 36, 42, 48, 54, 60 and 72-points 1.40
- Font "H"**—1-point Brass Thin Spaces, half case or section lot of 10 ounces, cut same lengths as spaces in Font G 1.25
- Font "I"**—2-point Metal Thin Spaces, full case lot of 30 ounces, cut in same lengths as spaces in Font G 1.00
- ½-point copper, 1-point brass, and 2-point metal are used for these spaces and leads; the compositor can readily distinguish the three thicknesses by their color. Each space has its size stamped upon it.

METAL LEADS AND SLUGS

Leads and Slugs that are not accurate are worse than worthless. We are large manufacturers of Leads and Slugs, and we shave ours on both sides, top and bottom, and guarantee them to be as accurate as regular foundry type, which greatly enhances their usefulness in connection with the point and lining systems. To meet the ideas of both the local trade and printers outside of Philadelphia, we make two styles of metal leads and slugs. One known as "*Philadelphia Height*" which is eleven-sixteenths of an inch high and has round edges, top and bottom; the other as "*Standard Height*" which is the regular three-quarter-inch height with flat top and bottom. The "*Philadelphia Height*" being lower, is lighter than other kinds, and consequently contains more pieces to the pound. Both are made of the very best quality of metal, not too brittle, and not too soft, but just right. In ordering please specify "*Standard Height*" or "*Philadelphia Height*," as the case may be, otherwise "*Standard Height*" will be furnished.

PRICES OF METAL LEADS AND SLUGS

	STRIP 8			CUT 7 EMS AND OVER AND LABOR-SAVING			CUT 2 TO 8 1-2 EMS PICA
	1 POUND	50 POUNDS	100 POUNDS	1 POUND	50 POUNDS	100 POUNDS

2-pt. 6 to pica } and thicker . }	16	15	14	20	19	18	35

Above are the quantity prices for any one body ordered at one time.

Labor-Saving Metal Leads and Slugs in graduated lengths from 4 to 25 ems inclusive are carried in stock in fonts of 25 pounds, 50 pounds, and multiples thereof.

The following tables show how many pieces of the different sizes are contained in a 25 pound font of 2-point leads; a 25 pound font of 6-point slugs and a 25 pound font of 12-point slugs:

2 Point	6 Point	12 Point
88 each . . 4 to 12 ems	26 each . . 4 to 10 ems	13 each . . 4 to 10 ems
70 each . . 13 to 18 ems	24 each . . 11 to 16 ems	12 each . . 11 to 16 ems
60 each . . 19 to 25 ems	22 each . . 17 to 25 ems	11 each . . 17 to 25 ems

Special Fonts to order.

THIN SPACE INFORMATION, (Cont'd)

‡KEYSTONE THIN SPACE CASE "D"

This case holds 1 pound of ½-point Copper Thin Spaces, 1 pound of 1-point Brass Spaces and 3 pounds of 2-point Metal Leads. The Copper and Brass Spaces are cut to the following sizes: 6, 8, 10, 12, 18, 24, 36, 48, 60 and 72-points. The Metal Leads are cut to the following sizes: 18, 24, 36, 48 and 60-points.

Price of Case, filled	\$5 00
Price of Case, empty	65
One pound font 1-point Brass Thin Spaces, assorted	1 75
One pound font ½-point Copper Thin Spaces, assorted	1 75
2 ounce package of either Copper or Brass Thin Spaces cut any one size	25

‡KEYSTONE THIN SPACE CASE

This case is 2½ x 7¼ inches and is divided into two sections: one for ½-point Copper Spaces and one for 1-point Brass Spaces. Both thicknesses are cut from 6-point to 72-point inclusive. The various bodies are stamped above each compartment in bold black figures. Each half section of the case will hold 11 ounces of ½-point Copper Spaces, 12 ounces of 1-point Brass Spaces, or 15 ounces of 2-point Metal Spaces. Like the Justifying Lead Case, this Space Case can be placed on the board between the upper cases on an ordinary double stand.

Case filled with Copper and Brass Spaces	\$3 15
Case filled with 2-point Metal Leads	1 50
Case, empty	50

‡KEYSTONE JUSTIFYING LEAD CASE

This case is 3¼ x 7¼ inches, and is divided into compartments to contain certain lengths, varying from ½ em to 16 ems of 12-point (by 6-point steps up to 6 ems 12-point) including also the intermediate lengths of 8, 10, 14, 16 and 20 points. The length of the lead is stamped in bold black figures above each compartment. The leads cannot fall down and are not difficult to get at. A single case holds about 3 pounds 6 ounces of 2-point Metal or 2 pounds 11 ounces of 1-point Brass Leads. A pair of these cases fit nicely between the two upper cases of a double stand.

Case filled with 1-point Brass Leads	\$4 60
Case filled with 2-point Metal Leads	1 85
Case, empty	60
Cases, per pair, empty	1 15

‡For illustrations of these Cases see page 552.

KEYSTONE LEAD AND SPACE CASES—IN SETS

The space between the upper cases on a common double stand will conveniently hold a "set" of these cases, consisting of one Thin Space Case (for ½-point and 1-point spaces) and two justifying Lead Cases (one for 1-point the other for 2-point leads). If desired, an extra Thin Space Case (for holding 2-point metal spaces) can be added, the four not taking more than 7½ x 12 inches of room.

Per set of 3 (2 Justifying Lead Cases, and 1 Thin Space Case) filled	\$ 9 00
Per set of 4 (2 Justifying Lead Cases, and 2 Thin Space Cases) filled	11 00

12 Point No. 745

Brass round corners can be furnished for any
rule shown on this or opposite page.

6 Point No. 752

12 Point No. 755

LABOR-SAVING BRASS PANEL RULES

Brass Rule panels or boxes are constantly growing more popular in large newspaper advertisements. They are effective in emphasizing articles and prices in single and double page advertisements, which are read at a glance and must be clear, comprehensive and convincing. They also give a bright and clean-cut appearance to large display work. To meet this demand and effect a great saving in time, labor and composition to our customers, we now furnish regular fonts of panel rule, each piece cut to even picas inside measurement. Each piece is mitered at both ends (see illustration herewith) and the inside measurement is stamped upon each piece and is always even picas unless otherwise ordered. Panels of any given number of ems up to 50 inside measurement may be made with four pieces of this rule, and with a font "ads with panels" can be as quickly and cheaply set as ordinary matter.

The illustration shown is made up from a stock font of Rule No. 425 showing how panels of various sizes and lengths can be set, and the great economy is apparent. Regular Labor-Saving Rule fonts are inadequate for this kind of work and the waste and labor necessary to cut the pieces from Strip Rule is large and expensive, but with these fonts all is easy.

Regular fonts contain four pieces of each length from 1 to 50—12 point ems, inside measurement graduated by 12 point ems.

Brass Panel Rules can be furnished in regular fonts of all plain faces and regular bodies, at prices below. They may be cut to order of any face rule to any scheme or lengths wanted at prices quoted upon application.

Flat face, double parallel, and other plain face rules furnished in regular fonts at prices below.

LIST PRICES OF L. S. BRASS PANEL RULE IN FONTS

2 Point, 4 pieces each, from 1 to 50 ems, inside miters	\$13 55
3 Point, 4 pieces each, from 1 to 50 ems, inside miters	14 95
4 Point, 4 pieces each, from 1 to 50 ems, inside miters	20 10
5 Point, 4 pieces each, from 1 to 50 ems, inside miters	23 25
6 Point, 4 pieces each, from 1 to 50 ems, inside miters	28 50
8 Point, 4 pieces each, from 1 to 50 ems, inside miters	35 65
10 Point, 4 pieces each, from 1 to 50 ems, inside miters	40 45
12 Point, 4 pieces each, from 1 to 50 ems, inside miters	48 20

SELF-ADJUSTING RULE BORDERS

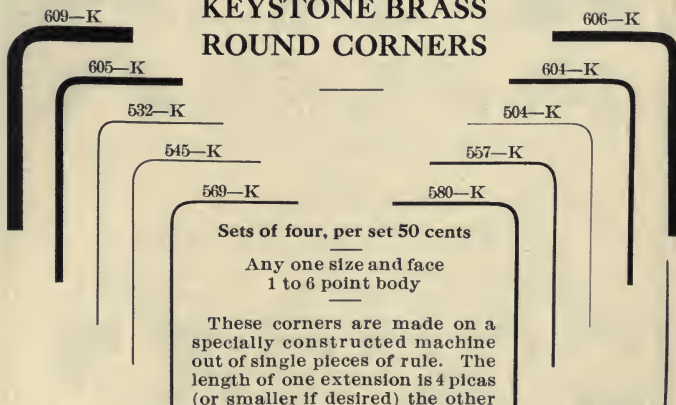

Very Useful for Newspaper Advertising, Drug Labels
and General Job Work

Each font contains eight brass corners and four pieces each of rule from one to ten Nonpareil ems inclusive, and two pieces each of rule from twenty to twenty-eight Nonpareil ems inclusive. All numbered.

Price per font, packed in neat box, \$3.00. Extra corners, 80 cents per set of eight.

KEYSTONE BRASS ROUND CORNERS

is $6\frac{1}{2}$ picas in length, so that two placed together equal a standard single newspaper column in width and make only one joint, where ordinarily two are required. Another feature is the extension which allows ample binding room in locking up, and practically effaces all difficulties in making the rules join.

BRASS ROUND CORNERS

12 Points Square. Per set of four, \$0 35

Above corners can also be furnished 18 points square. Per set of four, \$0 50

24 Points Square. Per set of four, \$0 60

Brass Round Corners can be supplied on either of the above bodies for any plain or parallel face rule made by us.

BRASS SQUARE CORNERS

12 Points Square
Per set of four, \$0 35

24 Points Square
Per set of four, \$0 60

For quantity prices of Brass Round or Square Corners, see page 500.

BRASS OCTAGON CORNERS

12 Points Square. Per set of four, \$0 35

18 Points Square. Per set of four, \$0 35

24 Points Square. Per set of four, \$0 50

Quantity prices of Brass Octagon Corners, see page 500.

BRASS CIRCLES, OVALS AND DIAMONDS

For complete price list of circles, ovals and diamonds, see page 501.

Larger size circles, ovals or diamonds made to order of any face rule.

In ordering ;
for size give diameter of circles and ovals, length of diamonds figured on the long way of the oval and diamond, inside measurements; for face give the number from specimen of rule desired shown on pages 506 to 512 inclusive.

WOOD GOODS OF HIGH GRADE

IN purchasing Wood Goods or Wood Type from any of the houses of the Keystone Type Foundry, our customers can rely upon getting the very best quality obtainable. We are very careful in selecting our stock in this line and handle none but the best. The manufacturers whose products we sell and for whom we vouch, stand right back of their wares on all questions of material and workmanship. Customers, therefore, not only have our assurances as to quality, but they also have the maker's guarantee upon every purchase made from us.

Extensive floor space at all our houses is devoted to carrying large and well selected stocks of Cabinets, Cases, Case Stands, Case Racks, Imposing Stone Tables, Furniture and miscellaneous articles, aggregating many carloads, and we are therefore able to ship upon receipt of order the regular stock goods of the leading manufacturers of the country.

We call your attention to the several styles of handsome and useful Hard Wood Cabinets, etc., illustrated in this book.

KEYSTONE TYPE FOUNDRY

IMPORTANT NOTICE

THE following pages show in alphabetical arrangement an excellent variety of the best articles in the line of tools, material and supplies for printers. Our stocks of these goods at all Houses of the Keystone Type Foundry are large, comprising the best and latest improved goods, from the leading manufacturers. We are discriminating and painstaking in the handling of all such articles, and, as will be seen, exclude many things usually found in Type Founders' specimen books.

Those items marked with a black star (★) are not carried in stock at any of our Houses. We list them for the information and convenience of our customers and salesmen, and when purchasers wish us to accept their orders for anything so designated, which it is desired to have shipped with goods of our own manufacture or regular stock goods of any kind, such orders will be taken, but due allowance must be made for time necessary to obtain such items from the manufacturer.

We hold that no Foundry can furnish everything the printer requires and do justice to all parties—the customer, the manufacturer and itself. We therefore confine our stocks to the goods of our own manufacture, viz: Keystone Type, Brass Rules, All Brass Galleys, Leads and Slugs, and the most popular and best known furniture, tools, implements and material of the most responsible makers.

Everything listed in this book except those items marked with the black star (★) are in stock at all of our Houses and customers can order with reasonable assurance that shipment will be made promptly. This applies not only to goods of our own manufacture, but to all other goods which we claim to carry in stock.

BENZINE CANS

SUCCESS SAFETY BENZINE CAN

This can is made of brass, is strong and guaranteed not to leak. The top is a patented arrangement; by pressing down the flange near the top, as much or little benzine will flow as is wanted. The valve is so placed that it is protected from injury, and, as the mouth of the can is large, there is no trouble to fill it. Made in the quart size only.

In using this can, the benzine does not flow over the hand of the person holding it, thereby saving enough benzine to soon cover its cost.

- Pint Can \$0 60
- Quart Can 75

BENZINE CANS

UNION SAFE FLUID CAN

On this can the flow is regulated by depressing the circular finger-plate which forms part of the patent stopper. The finger need never come in contact with the contents of the can. The stopper is attached by a chain, which prevents its being separated from the can, and yet admits of the can being filled without interference. The stopper is made of heavy stamped sheet brass and is very durable and handsome in appearance. The can itself is made of heavy tinned steel. It is japanned a brilliant red, which makes it conspicuous and easily found.

Pint Can \$0 45 | Quart Can \$0 50

★UNION STORAGE CAN

In stock at Chicago only

This can is designed for use in storing benzine or oils. Evaporation or spilling is impossible, as the nozzle is automatically closed by means of a spring. It is strongly made of galvanized iron and is self-closing.

CABINETS

NEW DEPARTURE TYPE CABINETS

So many styles of cabinets are made that it is impracticable to show all. Send for the special cabinet circular.

These Cabinets, which possess all the advantages of other Cabinets, have the remarkable feature of combining from 25 to 33 Cases within the height of 43 inches, which is the correct height for a Flat Top Cabinet with Cases and Brackets on top for type-setting purposes. *This represents a gain of 33% per cent. in Case capacity over the best Steel Run construction heretofore offered to printers.* This result has been made possible by the use of our flat Steel Run which we illustrate. These runs are thin pieces of steel of great strength, fitted into saw-kerfs cut in the sides of the Cabinet and held in place by means of lips on the ends of the runs, so that such runs cannot possibly get out of place or become loose. The cost of constructing these Cabinets is somewhat less than the regular Steel Run construction, therefore our prices on these Cabinets are somewhat lower than other Cabinets. We can, however, guarantee that in points of strength and beauty, these cabinets are not surpassed by any other Cabinets of any manufacture. *Where compactness is essential in saving space, we unqualifiedly recommend these Cabinets to our customers, guaranteeing them to give perfect satisfaction.*

They are constructed of hardwood, finished in Antique Oak; the ends tastefully paneled and moulded, and the fronts ornamented and fitted with bronzed pulls. The Cases are of our best "New Departure" pattern covered with paper on the inside; the paper absorbs the moisture and prevents it from entering the bottom.

We list herewith on following page *twenty-two* sizes of "New Departure" Cabinets. Other sizes can be supplied at proportionate prices.

All the above prices and descriptions are for Flat Top Cabinets. Add to the price given for single tier Cabinets \$3.00, and for double tier cabinets, \$6.00, if wanted with Galley Tops. Brass Label Holders attached to a Cabinet at an additional price of 5 cents per Case, list.

All of the Cabinets listed above, with seven exceptions, contain Cases of standard depth, 1 $\frac{3}{8}$ inches outside the front, and such Cases require no further description. The seven special Cabinets we describe more particularly below:

- No. 51—Contains 33 two-thirds size Cases 16 $\frac{7}{8}$ x 21 $\frac{3}{4}$ outside measure. These Cases have a uniform depth of 1 inch outside the front, and are deep enough for all medium and small sizes of metal type without doubling fronts. Height of Cabinet 43 inches, which is convenient for type-setting purposes when Cases and Brackets are placed on top.
- No. 57—Contains 33 three-quarters size Cases, size 16 $\frac{7}{8}$ x 24 $\frac{3}{4}$ outside measure. Depth of Cases and height of Cabinet same as No. 51.
- No. 63—Contains 33 full size Cases, size 16 $\frac{7}{8}$ x 32 $\frac{1}{4}$ outside measure. Depth of Cases and height of Cabinet same as No. 51.
- No. 64—Contains 28 full size Cases, size 16 $\frac{7}{8}$ x 32 $\frac{1}{4}$ outside measure. These Cases are of four different depths; five Cases are $\frac{3}{4}$ inch, ten Cases are standard, 1 $\frac{3}{8}$ inches, and three Cases are extra deep being 1 $\frac{3}{4}$ inches, all measured outside the front. Height of Cabinet 43 inches, which is convenient for type-setting purposes when Cases and Brackets are placed on top.
- No. 69—Is a two-tier Cabinet containing 66 full size Cases, size 16 $\frac{7}{8}$ x 32 $\frac{1}{4}$ outside measure. There are 33 Cases in each tier. Depth of Cases and height of Cabinet same as No. 51.
- No. 70—Is a two-tier Cabinet containing 56 full size Cases, size 16 $\frac{7}{8}$ x 32 $\frac{1}{4}$ outside measure. There are 28 Cases in each tier of four different depths; the depth of Cases, height of Cabinet is the same as No. 64 and each tier the same assortment of Cases.
- No. 71—A special Cabinet, with deep Cases, for ad. departments and job offices, that carry large fonts of body type. Contains 20 full-sized California Job Cases, 16 $\frac{7}{8}$ x 32 $\frac{1}{4}$ inches outside measure. News Cases can be substituted when desired. These deep Cases have a uniform depth of 1 $\frac{3}{4}$ inches outside the fronts. It is the only Cabinet with extra deep Cases ever listed. Height of Cabinet 43 inches, which is convenient for type-setting purposes when Cases and Brackets are placed on top.

CABINETS

PORTER'S PATENT EXTENSION-FRONT STEEL-RUN CABINETS

Combined with all the excellent features of other Steel Run Cabinets, the Porter Cabinet has the Improved Steel-Run and the Extension-Front, allowing any case to be drawn and placed at any convenient height, without using another case as a rest. The depth of the Extension-Front is 4 inches. As these Cabinets are fitted in the 23-Case and 46-Case sizes, with the Patented Tilting Brackets, they can be attached so that the News Cases on top are on the opposite side from the Job Cases, thus acquiring the distinctive and valuable feature of the Polhemus Cabinets. The option is given purchasers of having Cabinets fitted with the regular Job Case or the California Job Case. *Unless otherwise stated, all Cabinets are filled with California Job Cases.*

★ TWENTIETH CENTURY UNIT TYPE CABINETS

In stock at San Francisco only

The cabinet here shown represents a great stride in cabinet construction in more than one direction. Heretofore the unit system has not been applied to type cabinets. Its adaptability will at once become apparent. Units can be added from time to time.

With full size California Job Cases

Unit A,	10 cases of various depths	\$17 50
Unit B,	8 cases, 7 of regular depth	15 00
Unit C,	8 blank cases for electrotypes	13 00
Unit D,	8 indexed electrotpe cases	16 00
Cap Piece,	Style A, plain	3 00
Cap Piece,	Style B, drawer and 60 sort boxes	7 50
Base Piece		1 50

In ordering care should be taken to specify Cap and Base Pieces as they are not included with order for Units unless specially mentioned.

The Style A Unit has 10 cases of five different depths. The three top cases have an outside depth of ¾ inch; the next two, ¾ inch; the next one, 1 inch; the next three, 1¾ inch, which is our regular case, and the bottom case has an outside depth of 1¾ inches. This case is very convenient for large poster fonts.

The Style B Unit has 8 cases, 7 of which are of the standard depth as put in all of our regular cabinets. The top case is shallower and has an outside depth of 1 inch.

CABINETS

WISCONSIN WINDOW CABINETS

Specially designed for placing in front of a window, as it does not obstruct the light, of which the cases on top get the full benefit. Two men may work undisturbed at the sides, while the job cases in front are convenient for other men. These cabinets have the patent tilting bracket and galley rest, which enables the compositor to empty his stick without leaving the cabinet, by simply tilting his lower case, as shown in the cut, thus exposing the galley. Made in ash, with antique oak finish, or hardwood, cherry finish. Bottom is made flush to the floor to prevent pi from getting underneath cabinet.

- No. 1, with 18 full size cases, 2 pairs News cases and 2 pairs Patent Tilting Brackets on top \$36 00
 No. 2, with 23 full size cases and Steel Runs, 2 pairs News cases and 2 pairs Patent Tilting Brackets on top, same height as No. 1 47 00

WOOD TYPE CABINETS

Made of oak or hardwood with cherry finish and the slots in the cases can be adjusted to any size wood type. ★

 - No. 6-Double Polhemus Cabinet, with Steel Runs, containing 50 full size Cases, 25 in each of the two tiers, 2 pairs of News Cases and 2 pairs of Hamilton's Patent Tilting Brackets on top, full length Galley Dump, without Sort Drawers or Galley Cabinet 95 00
 - No. 7-Single Polhemus Cabinet, with Steel Runs, containing 25 full size Cases in one tier, 1 pair of News Cases and 1 pair of Hamilton's Patent Tilting Brackets on top, full length Galley Dump 47 00
- Options-In ordering customers will please be particular to state their choice of the following options:
- 1st. Cabinet to be constructed of ash or birch.
 - 2d. California Job Cases or Regular Job Cases. See page 547.
 - 3d. Sort Drawers or Galley Cabinet in center of double Cabinets.

CABINETS

★ROLL FRONT CASE RACKS

This is an entirely new feature in case racks. There has been a constant demand for a case rack that would take the old cases and utilize them in the form of a cabinet. Many printers have desired to do away with the regular case racks and substitute cabinets, and thus increase the life of the type by keeping it free from dust, but on account of the expense involved,

and the fact that their old cases could not be sold or utilized, they have hesitated in making the needed improvement; this new case rack solves the problem. The old cases can be used or new ones can be purchased with the racks. These roll front case racks are equal to cabinets in every way, and are fitted with steel runs and are thoroughly up-to-date.

16 racks, height 45 inches.	30 racks, height 73 inches.
20 racks, height 53 inches.	35 racks, height 83 inches.
25 racks, height 63 inches.	40 racks, height 93 inches.

PRICES

With racks for 16 cases	\$20 00
With racks for 20 cases	23 00
With racks for 25 cases	28 00
With racks for 30 cases	32 00
With racks for 35 cases	35 00
With racks for 40 cases	40 00

These prices are for the case racks only.

CABINETS

★SPECIMEN CABINETS

Designed specially for keeping specimens of printing. The drawers have movable partitions, and are made in two depths—2½ inches and 5 inches. They are handsomely made, and will be an ornament to any office. The methodical classification and preservation of specimens in a cabinet enables customers to decide on what they want quickly. A specimen cabinet is a necessity in every printing office, if you let the public see what you have to sell they will become buyers.

INDEXED ELECTROTYPE CABINETS

The use of these Indexed Electrotype Cabinets absolutely prevents any cut from being lost or mislaid, and but a moment is required to find any original cut or electrotype. When in use the Cabinet is so arranged that each cut or electrotype has a place specially partitioned off for its accommodation. This space is laid out in the right size to accommodate the cut, and there is no waste of room. It is properly recorded in the Index Book, which accompanies each Cabinet.

CABINETS

GALLEY CABINETS

Are made of thoroughly seasoned hardwood, in the most substantial manner, and are designed to carry an immense weight. The flat-top cabinets are constructed with flat sides and the shelves are grooved into the upright divisions. The galley-top cabinets are superior, with panel ends, and shelves rest on strips securely fastened to the upright division. This method of construction reinforces the frame and makes them much stronger than the flat-top cabinets.

No. 1. With shelf for ink, shelf for brayer and ink slab, and brackets to hold 6 eighth and 6 quarto rollers; weight 75 lbs. \$6 50

No. 2. With shelf for ink, shelf for brayers and ink slabs and brackets for 6 each eighth, quarto and half medium rollers; weight 100 lbs. \$9 50

No. 3. With shelf for ink, shelf for brayers and ink slabs, and brackets to hold 12 each eighth, quarto and half medium rollers; weight 135 lbs. \$13 00

CABINETS

★INK CABINETS

Many dollars are annually lost by job printers, in the single item of ink wasted through lack of a proper place to keep the cans or jars containing the same. This is particularly so in regard to colored or high priced inks, not continually in use. With the ink cabinet, the loss of ink from such sources will cease.

Contains four compartments suitable for ink, etc. with marble slab, 18 x 24 ins. on top for mixing inks.

Price \$13 00

HANDY LETTER BOARD CABINETS

For job work, these Cabinets are unrivaled, and will save their cost in a few months by preventing pilage. They occupy a floor space of 16½ x 20 inches, with letter boards 12 x 15 inches inside, and are made of hardwood in a solid and substantial manner.

- ★ No. 25 With 10 B'ds . \$14 50
- ★ No. 26 With 12 B'ds . 17 00
- No. 27 With 16 B'ds . 21 00

★HARDWOOD LETTER BOARDS

These letter boards are made to fit regular case racks and stands, and are constructed of the same material and in the same style as those described above.

- no.
1. 21¾ x 20½ in., each . \$1 20
 2. 26¼ x 20½ in., each . 1 40
 3. 32¼ x 20½ in., each . 1 70

No. 1 fits two-third stands;
No. 2 fits three-quarter stands;
No. 3 fits full size stands or racks.

CASE RACKS

The Case Stands and Racks are all made of hardwood, and bolted together firmly. The high Case Racks are braced at the center with bolted rods to prevent spreading.

CASE STANDS

NEWS AND JOB STANDS

No. 2. Single, with racks for 12 two-thirds cases	\$3 00
No. 4. Single, with racks for 12 full size cases	3 25
No. 6. Double News, with racks for 8 full size cases	3 75
No. 7. Double News, with racks for 10 full size cases	4 25
No. 9. Double Job Stand, with racks for 8 full size and 8 two-thirds cases	4 25

No. 11. Double Job Stand, with racks for 12 full and 12 two-thirds cases	\$5 50
No. 13. Double Stand, with galley rest, and racks for 16 full size cases	5 50
No. 14. Double Stand, with galley rest, and racks for 20 full size cases	5 75
No. 15. Double Stand, with galley rest, and racks for 24 full size cases	6 00

Paneled Ends to any of the above Stands \$1.00 extra.

CITY STANDS

The upper case projects forward over the lower, bringing it nearer the compositor, who sets caps with greater ease than from the ordinary stand. Under the lower case there is a shelf to hold a galley, and the lower case may be pushed back as far as is necessary to permit emptying type on the galley without leaving stand. The Single City Stands are made to hold 15 full size cases, and the Double City Stands to hold 30 full size cases.

No. 1. Single, with racks for 15 full size cases	\$5 75
No. 2. Double, with racks for 30 full size cases	8 00

CHASES

THE MCGREAL COMBINATION PRINTER'S CHASE

PATENTED

ABOVE ILLUSTRATION SHOWS THE SECTIONS AND
THE CHASE READY FOR USE

By the use of this chase you can always make a chase the proper size for the form. This gives a perfect lock-up in the minimum time and avoids the working up of leads, slugs, quads, etc., which is invariably caused by a "springy," ill-fitting chase. This chase is composed of *four* pieces with female beveled dovetails on one end and male beveled dovetails on the other end of each piece. When fitted together they are rigid and firm. They are made from the finest grade of cold-drawn steel, one and one-half inches wide by five-eighths of an inch thick. All parts are interchangeable, accurately fitted at the joints, absolutely square, and can be put together and taken apart in a few seconds without hammering or pounding.

PRICE LIST

4-inch lengths . . \$1 20	18-inch lengths . . \$1 90	32-inch lengths . . \$2 60
6-inch lengths . . 1 30	20-inch lengths . . 2 00	34-inch lengths . . 2 70
8-inch lengths . . 1 40	22-inch lengths . . 2 10	36-inch lengths . . 2 80
10-inch lengths . . 1 50	24-inch lengths . . 2 20	38-inch lengths . . 2 90
12-inch lengths . . 1 60	26-inch lengths . . 2 30	40-inch lengths . . 3 00
14-inch lengths . . 1 70	28-inch lengths . . 2 40	42-inch lengths . . 3 50
16-inch lengths . . 1 80	30-inch lengths . . 2 50	

One pair each of 6, 8, 10, 12, 16, 18, 24, 28, 30, 32, 36 and 40 inches inside measurements, forms 6 chases at one time, and will make up in the different combinations 66 different sizes at a cost of \$50.20, or less than 80 cents per chase.

COMPOSING RULES

Steel Composing Rules, under 15 ems, each \$0 15
 Steel make-up Rules, under 15 ems, each 15
 Add for each additional 5 ems 05

COMPOSING RULES IN SETS

Pocket Rule Case, containing 12 assorted sizes of Composing Rules, (Leather Case) \$1 50

HARRISON'S "COMPLETE" SET OF COMPOSING RULES

These rules are made of the finest tempered steel, highly polished in the following ems lengths: 4, 4½, 5, 5½, 6, 6½, 7, 7½, 8, 8½, 9, 9½, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 26½, 27, 28, 29, 30, 32, 35, 38, 40, 42, 45—forty rules in all. This case is constructed in a durable style of hard wood, finely finished, with a lining of velvet. Each rule is held separately, the figures denoting the length in ems are in plain view, and the rules are easily removed from the case.

Harrison's "Complete" Set of Composing Rules, with Case \$3 50

COMPOSING STICKS

PERFECT NEWS STICK No. 2

Set to 13 ems

To allow for the inevitable compression in the lines of type in locking up the form, the measure of this composing stick is made to a standard slightly larger than the point system. Price \$0 80

THE ROUSE JOB STICK

	2 IN. DEEP	2 1-4 IN. DEEP	2 1-2 IN. DEEP	NICKEL-PLAT-ING, EXTRA	2 IN. DEEP	2 1-4 IN. DEEP	2 1-2 IN. DEEP	NICKEL-PLAT-ING, EXTRA

THE ROUSE COPY HOLDER

This is a practical and effective device for job printers. It saves time, patience and money, and prevents the loss of copy. It was designed as an adjunct to the Rouse Job Stick, but can be easily attached to any composing stick by having the necessary holes drilled in the stick. Rouse Copy Holder \$0 25

CORNERING, PUNCHING, STABBING MACHINE

THE STERLING

This machine is designed to meet the requirements of printers and bookbinders. It is simple in construction and very rapid. Every part is made with the utmost care and nothing but the very best material is used in its construction.

A round cornering machine is particularly desirable in shops that aim to be progressive. It costs very little to round corner a thousand catalogues or booklets; a boy of average intelligence can do the job in ten or fifteen minutes, or he can take a thousand ordinary business cards and round corner them in less than five minutes.

This little machine embraces three in one. The illustration shows the machine ready for round cornering. By adding a table and changing the knife for a punch, which can be done in two minutes, it is transformed into a punching machine. It can also be quickly transformed into a stabbing machine, suitable for binding check books and this class of work. Four sizes of corner knives and three sizes of punches are made.

Round Cornering Machine, with one knife	\$15 00	
Pedestal Foot Power Attachment	15 00	
Bench Foot Power Attachment		\$10 00
Punching Attachment		10 00
Stabbing Attachment		5 00

Eyelet Attachment, Style R, about $\frac{1}{8}$ inch		2 00
Eyelet Attachment, Style S, about $\frac{3}{8}$ inch		2 00

(Note: the Eyelet Attachment is used on the Punching Attachment. It cannot be applied to the Round Cornering Machine alone.)

Style O Eyelet Set uses AO eyelet; fits hole of Style A Punch.
 Style P Eyelet Set uses BP eyelet; fits hole of Style B Punch.
 Style Q Eyelet Set uses CCQ eyelet; fits hole of Style CC Punch.
 Style R Eyelet Set uses DDR eyelet; fits hole of Style DD Punch.
 Style S Eyelet Set uses ES eyelet; fits hole of Style E Punch.

COUNTING MACHINES

HART JOB PRESS COUNTER

There has been a great desire on the part of the up-to-date printer for a good, reliable counter for the job press at a reasonable price. Many have equipped their presses with counters connected with the throw-off at an expense of \$10 or more. We are now able to offer to the trade one of the best little counters ever made. Every part is first-class and nickeled. Gears and dogs are stamped from steel and case-hardened, making them very durable. We have an attachment by which the counter can be put on in connection with the throw-off, to get an ab-

solute record only of every printed sheet. The clamp to hold the bracket on the fountain-arm, and pulley with clamp to fasten to roller-arm, are all included with throw-off device.

INSTRUCTIONS.—When clamped on, as shown in cut, bend arm up so counter is perpendicular. Put the cord through roller and around the eccentric shaft and fasten to set screw. When the impression is on, counter will register, and when off, cord will be loose and not register. These are for Chandler & Price presses and all Gordons and others working that way.

For the Universal and those working that way, the counter is fastened under the throw-off, and when the press moves up it will register just before the impression. We send a device to reverse the handle movement.

Size 1¾ x 4¼ inches, registering 10,000	\$3 00
Size 1½ x 5 inches, registering 100,000	3 25
Press Attachment (only)	50

DURANT COUNTER

Is especially adapted for use on printing presses. It is made entirely of iron, steel and brass. The dials have large black figures that are

easy to read at a distance. They can be instantly reset to 0, or any other number required. A bracket is furnished with each machine for convenience in securing it to the feed-board of a press. Counter is nicely finished—cover, lever, dials, springs, etc., being nickel-plated.

No. 1, counts 9,999	\$8 00
No. 2, counts 99,999	10 00
★ No. 3, counts 999,999	12 00
★ No. 2A, with 4-inch gong to give alarm at each 100	15 00

CUTTING STICKS

Square, 12 to 32 inches long, each 10 cents to 30 cents
 Prices on round or octagonal sticks on application.

★HAMILTON'S CUTTING STICKS

This Stick consists of a main body piece (A), made to fit the body of the paper cutter. The body piece has a groove or recess in it, which holds a small strip (B), one-quarter of an inch square. This removable strip is the cutting surface and is held in place by a steel clamp (C), which is drawn up by the bolts (D). The cutting

strips being square, can be used on four sides, thus giving the same amount of service as the large size sticks heretofore used.

The steel strip or clamp (C), running the extreme length of the main body piece and firmly screwed thereto, effectively prevents springing and warping. There is no wear on the body piece and as it is fitted exactly to the body of the cutter, troubles from ill-fitting sticks (necessitating packing, etc.) cease.

When ordering, give size square the main body piece is to be. Be particular on this point, and see that groove in cutter is accurately measured. Give length of stick and state how far from front edge of stick the knife strikes. State whether knife cuts from right to left or from left to right. In ordering cutting strips, give the exact length required. All strips are cut to a standard uniform gauge and are sure to fit.

Main body piece, under 38 inches long	\$5 00
Main body piece, 38 inches to 54 inches long	6 00
Main body piece, 55 inches to 70 inches long	7 00
Main body piece, 71 inches to 84 inches long	8 00
Cutting strips, under 38 inches long, per dozen	25
Cutting strips, 38 inches to 54 inches long, per dozen	40
Cutting strips, 55 inches to 70 inches long, per dozen	50
Cutting strips, 71 inches to 84 inches long, per dozen	60

★DRYING RACKS

KOERNER'S INTERLOCKING DRYING RACK

With these Racks sheets are taken direct from the fly and may be stacked ceiling high, in a perfectly straight and rigid pile, which cannot be knocked over by accident, and with no more weight on the bottom than on the top sheets. This pile is a most effective drying room, occupying the floor space of only one rack, and from the time the sheets are fed into the machine until ready for shipment they need not be handled. The interlocking device makes the pile straight and rigid; each rack is firmly locked on its neighbor, but each slides with ease on the rack immediately below it. They save seventy-five per cent. of floor space over any other method of drying sheets, and from one to two per cent. of paper, and a vast amount of time. A further saving of time may be effected by placing the racks as they come from the fly board on one of the Wisconsin Printers' Trucks, made specially to take these racks. The side rails on Koerner Racks are 1 1/4 inches wide. The slats which support the sheets are 3/8 of an inch thick. When stacked, each Rack adds 1 1/8 to the height. Unless otherwise ordered the side rails are always made to run the longest dimension. The prices given below are for Racks with a clearance of 1 1/8 inches between, when racks are stacked. For a clearance of 2 1/2 inches add 25 per cent., and for a clearance of 3 inches add 35 per cent. to prices given below. Special Racks of any size and pattern can be made to order. Prices will be furnished on application and receipt of particulars.

DRYING RACKS

★NEW YORK DRYING RACK

Much paper can be stowed away and kept clean and undamaged while drying in our various Drying Racks, saving also much time in handling. Our cheapest Rack gives a drying area of 120 square feet, while actually using only 6 square feet of your costly floor space.

These Racks combine many desirable features at a very moderate price. The frame is hardwood and is strongly bolted together. The shelves are carefully and strongly made. The frame is mounted on casters and can be easily moved in any direction when fully loaded.

Dryer Shelves, 28 x 42 inches, per dozen						9 60

★CHICAGO DRYING RACK

The Chicago Drying Rack is the most substantial and desirable drying rack made, although it has fewer shelves than the New York Rack, the extra space between the shelves is a distinct advantage, as on small jobs the sheets can be handled without moving the shelf on which they are placed. When not in use, the shelves may be put out of the way as illustrated in cut; both frame and shelves are built extra strong; the shelves are framed all around. It is mounted on casters, making it easily moved when filled.

★FORM RACKS

FORM RACK NO. 2

There has always been a demand for a chase or form rack, but the difficulty has been in designing this much-needed article of modern printing office furniture in such a way as to economize space and at the same time maintain the required capacity. The new form racks illustrated herewith seem to meet all the requirements. They are strong and substantially built, and varnished the same as our regular line of cabinets.

The lower compartments in all racks are 36 inches in the clear, middle compartments 24 inches, and upper compartments 13½ inches.

END VIEW

- No. 0. Height, 6 feet 9 inches; width at base 22 inches; length, 2 feet 6½ inches. Shelves for 10 chases in each tier, 30 shelves in all. Price \$24 00

★LABOR-SAVING IRON FURNITURE

THIS furniture is made in the regular standard labor-saving sizes, accurate to the one-thousandth of an inch, and by reason of its hardness and strength will always remain accurate.

It can not be squeezed out of shape or size by tight locking, is not changed in size by being heated, as in stereotyped or embossing

forms, and is not easily nicked and bruised. It is, in fact, practically indestructible, never deteriorating in value. It is about 40 per cent. lighter than the ordinary labor-saving metal furniture, which is a distinct value. Forms in which it is used are lighter to handle and do not have to be locked so tightly to make them "lift." There is also less liability of springing chases and less weight for the presses to carry. It will be found especially valuable in color-work and wherever exact results or close register is required. When it is desired to lock regular forms, with only a single piece in each opening, as in book or law work, or periodicals, such outfits will be furnished with just the number of pieces required, of each exact pica size.

Secured under press table; for gauge pins when not in use. Size, 2½x3½ inches. Price, 25 cents; by mail, 7 cents extra.

GALLEYS

PARAGON ALL BRASS GALLEY

This illustration gives a splendid idea of the superior construction of this galley. Note the small corner section

which shows the patent corner lock, and the end view shows the shape of the sides which enable the workman to get an easy hold when lifting from stone or table—a time saver. The sides are riveted to the bottom (not screwed) and the manner in which the corners are locked make these the most rigid and longest wearing galleys on the market, yet the prices are no higher than any other.

CHALLENGE PLATE-ZINC GALLEYS

These galleys are made from double-rolled plate-zinc, especially prepared for that purpose. They are shaped in special moulds, the corners reinforced, making them substantial and durable. They are of the same thickness as regular brass galleys. They are especially adapted to storage purposes where type-setting and linotype machines are used. Special sizes will be made to order in lots of fifty or more at one time.

GALLEYS

CHALLENGE RIVETED ZINC GALLEYS

These galleys are designed for general use—particularly for storage purposes where it is desirable to keep the forms in the galleys while taking proofs and correcting. The corners are square where the sides attach to the bottom, thus insuring perfect proofs of type forms. The sides of Challenge Riveted Zinc Galleys are formed in the shape known as “channel,” thus making the galleys stiff, rigid and true; also making them very easy to lift from the stone when filled with type. Special sizes will be made to order in lots of fifty or more at one time.

GALLEY RACKS

The convenience of a strong, well built galley rack can scarcely be overestimated. It occupies but little room, is bolted to the wall, out of the way, and holds galleys of matter which would otherwise annoy the compositors. Their cost, considering their capacity and utility is slight, and they are a desirable and permanent fixture wherever used.

★UNION MOVABLE GALLEY RACK

This galley rack holds 30 galleys (15) on each side, and is mounted on strong casters, so that it can be moved at will to the most convenient position.

Union Movable Galley Rack, holding 30 galleys	\$21 00
---	---------

GRIPPER FINGERS

These fingers are fastened to the grippers by set screws. They are especially useful for work having small margins, or no margin at all, where the gripper would be useless. They attach firmly to the gripper, and can be relied on to pull any sheet from the form. For label work they are indispensable. They vary in size and shape to suit all varieties of work. Made in three shapes and each shape made in two sizes, $\frac{3}{8}$ inch for small and 1 inch for large gripper.

Either Finger \$0 50
 Complete Cross-bar (crossed any size platen) 1 50

HEIGHT GAUGE

Type High Hand Gauge \$2 50

An immense amount of time and trouble can be saved by the use of this little tool, besides enabling you to put a gauge on work sent in by electrotypers and engravers.

★IMPOSING STONE FRAME WITH LETTER BOARDS

(See Illustration and Prices on Next Page)

These imposing tables are strongly constructed to sustain the great weight to which they will be subjected. The frames and coffins as well as the letter-boards, are made of hardwood, and all the material entering into them is carefully selected and free from imperfections. No better disposition of the space underneath an imposing table can be made than to use it for letter-boards. If the type is dead it is shifted from the stone to the board without any loss of time; if the matter is alive it is handy for imposition

★THE TEXAS IMPOSING STONE FRAME

In stock at Chicago only.

FITTED WITH LETTER BOARDS AND SORT DRAWERS

These large modern frames will usually replace several ordinary pieces of furniture, such as the common imposing stone, sort cabinet, letter-board cabinet, etc. The size of the stone is 40 by 80 inches and 2 inches thick, of the best marble, smooth face and free from imperfections. The coffin enclosing the stone is depressed 1-16 of an inch below the top of stone, and is used as a rest for the galley, so that type matter can be passed from the stone to the galley. Height from floor to top of stone, 41½ inches. There are 20 drawers for sorts, and each drawer is subdivided into twenty equal compartments. Each drawer is 2½ inches deep, 14 inches wide and 40½ inches long, inside measure. Each of the four hundred compartments is 3¼ by 6¼ inches. Ten of these drawers are at each end of the frame, and all run clear through and draw from either side. Each drawer runs on twelve steel rollers, fitted into the runs, six on each side. This insures an easy motion notwithstanding the heavy weight supported. In the center, arranged in four tiers drawing from each side, are fifty-six hardwood letter boards, fourteen boards to each tier. These are placed compactly and represent 140 square feet of storage surface. These letter boards are 18½ by 19½ inches inside measure. They are lipped in front to receive the galley and have raised rims at sides and back. *Weight, complete, ready for shipment, including stone, 1,900 lbs.*

LABOR-SAVING METAL FURNITURE

IMPROVED METAL FURNITURE

The metal in this furniture is so evenly distributed that no part of a piece is weaker than another. The end and side-bearings are cast solid, top and bottom alike. The bracings run almost the entire depth, uniform on both sides, giving it at the same time strength, durability and lightness. It is the most accurate metal furniture in the market being carefully gauged to the point system.

Our Improved Metal Furniture is made in the following sizes: 50, 40, 30, 25, 20, 15, 10, 8, 6, 5 and 4 ems pica long, by 10, 8, 6, 5, 4, 3 and 2 ems pica wide. Put up in 12½, 25, 50 and 100 pound fonts, at the following prices:—

12½ pound font	\$3 15	50 pound font	\$12 50
25 pound font	6 25	100 pound font	25 00

Sorts to order per pound, 25 cents.

The fonts are carefully assorted and arranged, having the narrow and smaller pieces predominating.

The 25 pound fonts contain sizes from 10x25 to 2x4 ems pica, and the 50 pound or larger fonts, contain all of the above sizes, unless otherwise specially ordered.

QUOTATION METAL FURNITURE

We make our Quotation Furniture open on top and bottom, thereby lessening its weight without decreasing its strength. The following sizes are kept in stock: 4, 3 and 2 ems pica wide, by 4, 8, 12, 16 and 20 ems pica long. Can be made up to 84 ems pica in length, graded by 4 ems, if desired. It is finished accurately to pica ems on the point system. Put up in fonts of 25 pounds or more, or cut to order, at 25 cents per pound.

RAILROAD METAL FURNITURE

This Furniture is made up in the following widths: 10, 8, 6, 5, 4, 3 and 2 ems pica wide, by 17 inches long, except the 2 em, which is 14 inches long, and is cut to order, or cut labor-saving if desired, at the rate of 25 cents per pound.

LABOR-SAVING WOOD FURNITURE

All cases are made with partitions, but can be supplied either with (Style B) or without doors (Style A). Unless otherwise ordered Style B will be supplied.

- No. 2—Contains 2,400 pieces (600 yds.), 6-point and 12-point, 300 pieces each of 10, 20, 30, 40, 50, 60, 72 and 120 ems, 12-point long, with case, \$18.00; without case, \$12.00.

REGLET CASE No. 4

- No. 3. Contains 4,200 pieces (550 yds.), 6-point and 12-point, in lengths from 10 to 51 ems, varying by one pica only, 100 pieces of each length, with case, \$18.00; without case, \$11.00.
- No. 4. Contains 2,100 pieces (275 yds.), one-half the amount in No. 3; same lengths, from 10 to 51 ems, 12-point, varying by 12-point only, 50 pieces of each length, with case, \$11.00; without case, \$5.50.

Larger sizes at short notice. For prices of cut reglet, without cases, see under Furniture and Reglet.

LAMP BRACKETS

Lamp Brackets, each \$0 75

LEAD AND RULE CUTTERS

IMPROVED LITTLE GIANT LEAD AND RULE CUTTER

This machine retains all the desirable features of the original machine with several improvements. The long front bed is a great benefit, as the left hand of the operator is only employed in feeding the material, leaving the right hand entirely free to operate the handle, each cut dropping off the front bed without assistance.

No. 12, gauges 12½ inches back, 11½ inches front \$10 00
 No. 13, gauges 18 inches back, 14 inches front 13 00
 Graduated to picas

SINGLE GAUGE LEAD CUTTER

A cheap lead cutter. The knife has a shear cut, thus making the machine available for cutting thin brass rule as well as leads.

Price \$2 00

LEAD AND RULE CUTTERS

ROUSE AMERICAN LEAD AND RULE CUTTER No. 1

Rouse American Lead and Rule Cutter No. 1, not graduated; capacity 14 inches	\$ 6 00
Rouse American Lead and Rule Cutter No. 10, graduated to picas; capacity 84 ems	7 00
Rouse American Lead and Rule Cutter No. 20, Automatic Locking Gauges; capacity 105 picas by nonpareils	10 00

ROUSE AMERICAN LEAD AND RULE CUTTER No. 30

The gauges can be set instantly. They can be set to 6 points as well as 12 points. The front gauge can also be set quickly and positively from 1 point to 45 picas. It is impossible for either gauge to slip, or for material, however thin, to get under the bed gauge. The bed and gauge-rods are graduated to picas and numbered every five 12 point ems, the back gauge-rod to indicate the measure when extended beyond the end of the bed. The cutting arrangement is operated by a combined lever and provided with a shear-cut for brass and a straight-cut for leads. The support to the right prevents any sag in the material between the front gauge and the back knives. In cutting very short pieces, it may be turned back out of the way. Capacity of bed-gauge, up to 105 picas by 6 points. Capacity of front gauge up to 45 picas by points.

Rouse American Lead and Rule Cutter, No. 30	\$12 00
---	---------

LEADS AND SLUGS

Just a word about Keystone Leads and Slugs—There are none better; you will be wasting valuable time in looking for their equal. MORAL: "Sell Keystone Leads, and sell plenty of them." Like a country stage coach the print-shop has always room for more. Do away with that worn-out phrase "turn for them," so often heard in the composing room.

For prices, see Page 503.

LABOR-SAVING FONTS

Labor-Saving Metal Leads and Slugs in graduated lengths from 4 to 25 ems inclusive are carried in stock in fonts of 25 pounds, 50 pounds and multiples thereof.

For prices, see Page 503.

LEADER BOXES

Just "the thing" for holding leaders. The size is 5x8 x1¾ inches. You will require one for every size of body type in your office.

Each \$0 25

Per dozen 2 50

LEAD RACKS

EUREKA LEAD RACK

This lead rack is made in a neat, strong and durable manner, having a series of graduated spaces, with bottoms inclining backward, and also laterally, into which the different sizes of leads and slugs can readily be placed so that they will incline inwardly to prevent them from falling out, and also incline against each other to be retained in their respective places, whence they can be readily lifted out with the thumb and forefinger. Figures indicating the different sizes of leads and slugs are fixed upon the front edges of the upright pieces, to aid the compositor in using them. The first apartment is intended to be used for leads and the second for slugs.

This rack holds 180 pounds of leads and slugs, cut from 4 to 28 ems long, enough to do the job work of any ordinary office.

Size of Rack 14½x28½ inches.

Compartments are 5½ inches wide inside.

Price \$2 50

The Eureka Lead Rack can also be used for Labor Saving Reglet, a ont of which to fill this case consists of 170 yards cut into 2,250 pieces, 30 pieces of pica and 60 pieces of Nonpariel for each of the 25 different lengths.

Price \$4 25

LEAD RACKS

TWO-TIER WISCONSIN LEAD RACK

WISCONSIN LEAD RACKS

Common sense racks and are made in a superior solid style, and each compartment is numbered very plainly. A line-gauge rule is attached to every lead rack to assist the workman in determining lengths while distributing leads. Made in two sizes.

In the Two-tier Wisconsin Rack leads and slugs lie flat and will not pl. (In racks where leads are placed on edge pl inevitably results). There are compartments to take leads from 4 to 12½ ems (varying by ems), and from 13 to 60 ems (varying by ems), the lengths being stamped over each compartment. The rack is solidly built. Compartments are 8 inches high. Will hold 750 pounds of leads and slugs. Outside dimensions of this rack are 17¾x37 inches.

The Four-tier Wisconsin Lead Rack has two compartments each for all sizes in the two-tier rack described above, and is similar in design and construction. One compartment of each size may be used for leads and other for slugs or reglet. Will hold 1500 pounds of leads and slugs. Outside dimensions of this Rack are 34¼x37 inches.

Wisconsin Lead Rack, 2-tier	\$6 00
Wisconsin Lead Rack, 4-tier	9 00

THE BOSTON LEAD RACK

Made in four sections, which are sold separately, if desired. The different lengths which go in each section are stamped over each compartment, as shown in cut. A line-gauge for determining lengths is attached to each section. This is a popular, low-priced rack. The four sections accommodate lengths from 4 to 7, varying by ems, and from 7 to 60, varying by ems. The front of each section measures 8½x 17½ inches. Compartments are 6⅞ inches high.

MAIL AND SUBSCRIPTION LIST BOOK

THE KEYSTONE

By this system the names and addresses of subscribers are kept on movable labels or tags, which are securely held in position by a simple patented device, but which can be removed or changed in an instant.

The date of subscription, payment, etc., can be kept on the margin adjacent to labels for a number of years.

By this method no erasure or mutilation of the list or book need occur. In case a name is to be dropped from the list, remove the label and insert a new one, or the same label turned presents a new direction tag. If a change of address is desired from one list to another, the labels or tags can be shifted by the most simple manipulation. By this system of keeping lists, you always have the subscriber's account before you, with the date that it is paid to. The leaves and back of this book are made of the very best material, and will last for years.

PRICES

Book for 500 Names, Single Column	\$4 50

★MERCANTILE ADDRESSING MACHINE

A modern system of addressing Envelopes, Letters, Circulars, Bills, Statements, etc., operated by foot power or is fitted for steam when so ordered. Prints and moves the next address into place at one motion of the foot. It is built of iron and steel in the most substantial manner, very simple in all its parts, and will last a lifetime. Envelopes, Letters and Circulars can be addressed in the shortest time with the utmost accuracy. With one of these machines your office boy or girl can attend to mailing your circulars, etc., at the rate of 2,000 or more an hour. Costs but a trifle to keep your list corrected up to date. Names can be stored away in a neat convenient cabinet, occupying less space than by any other system. The names can be set in type or linotype slugs can be used.

No. 1—For 10 em names	\$35 00
No. 2—For 14 em names	40 00
No. 3—For 16 em names	50 00
No. 4—For 16 em names, with Duplicating Attachment	100 00

For further information write for complete circular.

MITERING MACHINES

HANSEN'S COMPLETE MITERING MACHINE

The rule holder has an angle of ninety degrees, so when placed in a central position you can miter square sets without changing its position. It is easily set by a pin for any desired angle, having no lines to guess at, thereby enabling the operator to obtain the required angle positively accurate at all times. It is graduated by 12-point ems and has two gauges, the left hand gauge having a supporter that enters any one of the holes of even ems, and by turning the supporter each quarter turn it lengthens or shortens the measure a 6-point em. You can get the inside measure by placing 2, 3 or 4 points between the supporter and gauge. The knife is held firmly by two screws and is regulated by two adjusting screws. A Jointer for sharpening the Knife to the proper angle is furnished with each machine. This enables the operator to always have the same bevel which is a very essential point in order to obtain a clean cut. The bed is indexed 2, 3, 4, 5, 6, 8, 10 and 12 respectively, representing the different angles for a 2, 3, 4, 5, 6, 8, 10 and 12 sided figure, therefore doing away with lines you have to guess at. The handle strikes a rubber tube which does away with noise and jar received on other machines.

Hansen's Complete Mitering Machine \$18 00
 Cups for Chips 50 cents extra

★CHALLENGE MITERING MACHINE

The most simple, convenient and accurate machine made for mitering brass rules. Always ready for use, has no knife to sharpen and adjust, does not injure the face or bottom of the rule, and miters so perfectly that rules may be used either side up. A file is used in place of a knife, and if one side is worn out the file may be reversed.

Challenge Perfection . . . \$10 00 | Extra files \$0 75

★NEWSPAPER FILES

HAMILTON'S NEWSPAPER FILES

These files are made of cherry nicely finished in oil. The fastenings are brass, with steel thumbscrew, having polished heads. The clasp end of the file has a flat-headed thumbscrew, which is passed through a slot, and by giving the screw one-quarter of a turn the file is securely locked. They are made in the following regular sizes; other sizes furnished if desired.

- To hold sheets 20 inches wide.
- To hold sheets 22 inches wide.
- To hold sheets 24 inches wide.
- To hold sheets 26 inches wide.
- To hold sheets 28 inches wide.
- To hold sheets 30 inches wide.
- To hold sheets 34 inches wide.

NUMBERING MACHINES

★THE IMPROVED WETTER NUMBERING MACHINE

This numbering machine is just type high, locks up in any form like a small cut, can be used on any job or cylinder press; prints clean and sharp; is small and compact enough to allow type matter to be set close to the figures, and will number from 1 up as high as you wish with accuracy and precision. All Wetter machines are made of best materials, with all parts interchangeable

and every machine guaranteed. Wetter machines can be made, on special order, with the plunger on the reverse end, or at top or bottom, at any distance from the figures desired, or they can be made to number backwards or with figures cut reverse for numbering on tissue paper; skipping wheels can be furnished to skip any number from 1 to 10, and other special combinations for numbering checks, bonds, coupons, etc., where there are more than one on a page. Wetter machines can also be made to print any one number any number of times, and then automatically advance to the next higher number. The prices below are for machines to number consecutively from 1 up:

NO. 12 IMPROVED	NUMBERS UP TO	STYLE OF FIGURES					
		J O R K	L	M	R	S	T O R P
5 Wheel Machine	99,999	\$14 00	\$18 00	\$25 00	\$18 00	\$20 00	\$27 00
6 Wheel Machine	999,999	17 00	21 00	28 00	21 00	24 00	30 00
7 Wheel Machine	9,999,999	21 00	24 00	32 00	24 00	28 00	

NUMBERING MACHINES

★WETTER NUMBERING MACHINES, (Continued)

The prefix "No." on all Wetter machines can be removed and another letter or any character inserted in its place without removing the machine from the press. This can be done in a moment.

Style J, K, and L of the 5 and 6-wheel sizes are kept in stock by the manufacturers and can be shipped immediately on receipt of order.

STYLE OF FIGURES FOR WETTER MACHINES

- STYLE T 123456789
- STYLE P 12345678

The above styles of figures are made in any size required up to 1 inch deep. In addition to the figures shown, over 100 styles are made, so that almost any style figure desired can be furnished.

★No. 4 CASH SALE WETTER NUMBERING MACHINE

For cash sale slips; automatic from 1 to 50 or 50 to 1 and repeat; or 1 to 100 or 100 to 1 and repeat. Different machines are required for different combinations. A letter can precede the figures (printing thus: A 50, B 50, etc.) by using a slide with a letter on it in place of the "No." slide that is furnished with each machine and which can be removed and any other character such as star (★) inserted in its place without taking the machine out of the form.

- 50 to 1 or 1 to 50, each \$10 00
- 100 to 1 or 1 to 100, each 13.00

Prices and any other information regarding other styles or special Wetter machines sent on application.

NUMBERING MACHINES

BATES TYPOGRAPHIC NUMBERING MACHINE

NEW MODEL NO. 27—SIZE $1\frac{1}{2}$ x $1\frac{1}{8}$ IN.

New Model, No. 27—a type-high automatic numbering machine designed to be locked in the chase with the form, wholly surrounded by type matter, or used separately to print the number only. Every figure disk is automatically advanced in consecutive order from 1 to 99,999.

The machine may be taken apart in an instant for cleansing, without removing any screws, and is quickly assembled again. The figures are cut upon steel wheels and are practically indestructible. Only the size and style of figures shown in accompanying cut are car-

ried in stock. Others are made to order at an extra charge. Letters engraved upon extra plungers or steel slides may precede the figures instead of the prefix "No." Letter wheels are also furnished. For numbering checks, orders, strip tickets and other jobs with several forms to a sheet, "skipping" unit wheels are furnished, which are interchangeable with regular unit wheels. Only the

best material and the highest order of mechanical skill are employed in its construction. All machines are guaranteed in every particular.

New Model No. 27	\$14 00
Model No. 28, for general job work, the same in every respect as Model No. 27, excepting it is made with six wheels; capacity, 1 to 999,999	18 00

Prices and descriptions of other styles of Bates Typographic Numbering Machines will be furnished on application.

NUMBERING MACHINES

BATES HAND NUMBERING MACHINES

These very superior machines operate consecutively, duplicate and repeat, and the changes are made instantaneously by moving the pointer on the dial. The movement of the figures is entirely automatic, and receive ink from a thick felt pad. The mechanism, material and finish are of the very best, all parts are interchangeable, and the operation is noiseless.

AUTOMATIC NUMBERING MACHINE

Made with six wheels and will number consecutively from 1 to 999,999; also duplicate or repeat as desired. These changes are effected by very simple means.

Model 49—Weighs only 12 ounces. Operated noiselessly and with remarkable speed and accuracy. Size and style of figures made are shown under the illustration. Price, \$5.00.

Letters and Fractions—Machines with letters for serial numbering—either preceding or following the figure-wheels—fraction wheels and wheels engraved with any characters required, will be made to order. Wheels with ten letters or less, \$1.50 each. Wheels with seven fractions or less, \$2.00 each. Each special wheel reduces the numerical capacity, as it takes the place of a figure wheel.

Special Movements—Machines will be made to order which will triplicate, quadruplicate or repeat any number of times up to ten, and advance one unit automatically. Such movements take the place of the usual duplicating mechanism. Extra charge, \$1.00.

Model 50—Automatic Hand Numbering Machine with Indicator, depressible wheels and protected plunger, numbers consecutively from 1 to 999,999, or can be set to duplicate or repeat the same number indefinitely by simply moving the indicator to the point desired, price \$15.00.

Model 47—Automatic Hand Dating Machine, with lever attachment, price \$5.00.

★PAPER CUTTERS

ADVANCE LEVER PAPER CUTTER "Pony Size"

These cutters fill a special field of usefulness. They are unequaled for cutting and trimming small work of any kind, and are valuable alike to small and large establishments, even though larger lever or power cutters be employed. These cutters are

first-class in every respect, and due care is taken to make them equal to the larger Advance paper cutters in material, workmanship and finish. They possess greater strength and durability, and are more easily operated than any other cutter of like capacity. Their accuracy is absolute.

They are furnished with the interlocking back gauge and clamp, with which stock may be gauged to within one-half inch of knife. The back gauge is made extra long, bringing it close to side gauge. There are no springs, gears or cams to get out of order. The 19-inch cuts all usual sizes of flat papers—cap, demy, folio, medium, double cap and royal.

SIZE	SQUARES	PRICE
16-inch	16 inches	\$50 00
19-inch	19 inches	65 00

PAPER CUTTERS

★ ADVANCE LEVER PAPER CUTTER

“The Easy Cutter”

Greatest Cutting Capacity for the Least Money

SIZE	SQUARES	LIST PRICE
16-inch { PONY }	16 inches	\$ 50 00
19-inch { SIZE }	19 inches	65 00
22½-inch	22½ inches	90 00
25-inch	25 inches	110 00
30-inch	30 inches	165 00
33-inch	33 inches	200 00

Notice the illustration ; the lever is at the end of cut ; you don't have to break your back stooping to the floor.

The **Advance Cutter** is built on strictly mechanical principles, and is the most practical moderate-priced cutting machine ever manufactured. The 22½-inch and all larger sizes have gibs and setscrews in side frames to take up wear of knife-bar ; the bed is supported in center by a heavy cast iron cross-brace. It has no gears or springs to get out of order, the knife-bar being controlled by a link motion, and the lever and knife-bar are counter-balanced. The knife has a dip-cut, which makes the cutting very easy. Special care is given to accuracy in having all gauges perfectly squared to the knife. This cutter is also furnished with the interlocking back gauge and clamp, without extra cost, which permits stock to be cut to widths of three-fourths of an inch. The back gauge is made extra long, which brings it close to the side gauge enabling both gauges to be used in squaring small stock. A figured scale is sunk in the table for convenience in cutting to measure.

Write for complete circular.

PAPER CUTTERS

★ADVANCE POWER PAPER CUTTER

PATENTED

SIZE	SQUARES	LIST PRICE
30-inch	30 inches	\$300 00
33-inch	33 inches	350 00

Is fitted for hand and steam, is solidly built, the frame is firmly stayed by two substantial cross-braces, upon which is bolted the arch that supports the center of the bed, making it perfectly rigid and firm under pressure of clamp or knife. The clamp and gauge screws on all shafts and studs are steel. It has gibs and setscrews to take up wear of knife-bar; interlocking back gauge and clamp; brass figured rules in bed, back and front. All gears are cut; the clutches and driving gear are cut out of solid steel. The throwoff stops the knife at highest point of stroke automatically. It may be thrown off at any point by hand, in case of error, and backed up to save stock.

PAPER CUTTERS

★RELIANCE LEVER CUTTER

For Strength, Accuracy and General Construction it has no Equal
Clearly Outranks all Cutters of its Class

MADE IN FOUR SIZES

SIZE	SQUARES	PR. CE.
16 $\frac{1}{2}$ inch	16 $\frac{1}{4}$ inch	\$ 55 00
23 $\frac{1}{4}$ inch	23 inch	90 00
25 $\frac{1}{2}$ inch	25 $\frac{1}{4}$ inch	110 00
28 $\frac{1}{2}$ inch	28 $\frac{1}{4}$ inch	135 00

The Reliance is amply braced to insure strength and rigidity. The bed is cross-ribbed underneath, with an extra wide brace or flange on the outer end, and it is additionally strengthened by the heavy center brace. The top arch, which receives the strain of the clamp, is well formed and extra heavy, as is also the knife-bar and clamps. These are reasons why there can be no springing or yielding on the Reliance—features essential to accuracy as well as durability.

The lever system is simple and unusually powerful, rendering heavy cutting remarkably easy. The lever is keyed to the shaft, as is also the crank. The arm connecting knife-bar with crank has direct line with the motion of the knife-bar, thereby giving the leverage full force and guarding against lateral strain and wear on the knife-bar and slots.

The knife, when elevated, is about three-fourths of an inch higher on the right end than on the left. This gives the descending knife the desirable *shear-like* motion, cutting smoother and much easier than is the case with cutters having little or no shear cut.

The Cutter has the interlocking back gauge and clamp, and gauges and clamps as narrow as one-half inch; and the back gauge extends to within one inch of side gauge, so that the two gauges can be used together in squaring small work.

Side Steam Fixtures \$15.00 extra. No charge for boxing and shipping.

GALLY UNIVERSAL PRESSES

These presses are adapted to all kinds of work, from the lightest card work to the heaviest embossing and wood printing. The fountain and distribution on these presses are as efficient as on the highest grade cylinder presses. The weight and strength are greater than in any other platen press, as it is designed to do work that cannot be safely attempted on any other type of press.

They are built in several styles and combinations.

Style No. 1 is the regular press, adapted for general letter press work. The platen is supported by five heavy jack-screws, by which it can be readily adjusted. It has steel shafts, the double adjuster bar with two adjuster latches and two adjuster slides on half-medium and half-super royal only. All parts are interchangeable.

Style No. 2 differs from Style No. 1 in that it is more heavily built and has a steel section in large gear wheel. It has, also, special attachments for commencing the rolling of forms from both top and bottom, which specially adapt it to fine or large tint work.

PRESSES

★GALLY UNIVERSAL PRESSES

Style No. 3 is adapted, by different combinations of special devices, to the finest and heaviest classes of cut and solid tint printing, hot or cold embossing or stamping, "case printing" for bookbinders and wood printing.

★HAND AND CYLINDER PRESSES

We can furnish all makes of hand and cylinder presses at manufacturers' own prices. Send for prices and descriptive circulars.

PRESS POINTS AND WRENCH

These points are far superior to the old method of driving nails or wire in wood furniture to make holes in sheet, as they are screwed in as far as the cross bar with wrench furnished, when they will stand the right height.

Press Points, per dozen \$0 75
 Wrench, each 75

PRESS PUNCHES

★MULTIPLEX PRESS PUNCH

This is the only punch with a magazine for catching the waste disks, insuring absolute safety from the bits of paper getting on the inking rollers, in the type matter or bearings of the press, and for this reason it is the only punch that can be worked successfully on a cylinder press as well as on a job press. The punches are adjustable on the magazine, which locks in the form in any position, the same as a piece of furniture. The machine is less than type-high and is operated from the platen, avoiding any obstruction to feeding, damage to the inking rollers, or soiling of the stock. Made in two sizes, 8 x 30 ems and 8 x 50 ems.

One Multiplex Press Punch, 8 x 50 ems, with 4 dies \$4 00
 One Multiplex Press Punch, 8 x 30 ems, with 2 dies 2 50
 Extra Dies, per set of two 50

Size of dies: $\frac{1}{8}$, $\frac{1}{16}$, $\frac{1}{4}$, $\frac{1}{8}$ inches.

Price of parts: set of 2 nuts, 25 cents; set of 2 washers, 25 cents; but-nut wrench, 10 cents; tympan disks, per dozen, 25 cents; rubber markers, per $\frac{1}{2}$ dozen, 25 cents.

PRESS PUNCHES

★BULLOCK EJECTOR PRESS PUNCH

This punch is made 2 points lower than type-high and one or more can be locked up in a type form, and will cut a round clean hole in paper or cardboard at the same time the job is printed.

It will not clog, as each piece cut is ejected by a plunger and falls to the floor as soon as the impression is taken from it. The cutters are all mounted on the same size body, and all parts are interchangeable.

Brass rule should be used under the outer sheet of the tympan for a cutting surface.

Punch for $\frac{3}{32}$, $\frac{1}{8}$, or $\frac{1}{4}$ inch sizes, each \$0 75
 Punch for $\frac{3}{16}$ or $\frac{1}{4}$ inch sizes, each 1 25

Cylinder press rollers, per pound, 35 cents. Hand press roller, 3 inches in diameter, 10 cents per running inch; larger than 3 inches, 35 cents per pound.

Roller Composition, from 35 cents to 50 cents per pound.

ROLLER CLOTH

FELT FOR DISTRIBUTERS

In rolls of cloth 2½ inches wide and 12 yards long, per roll \$5 00
Per yard 50

ROLLER SUPPORTERS

These bearers for job presses are locked up with the form in the chase. They take the undue weight of the rollers off the form, prevent over-inking, cause a more even distribution, and prevent the cutting of the rollers by rules or leaders. In other words, they save the rollers and improve the press-work.

SHOOTING STICKS

Wrought Steel, small, nickel-plated, each \$0 60
 Wrought Steel, large, nickel-plated, each 75

SPHINX PRINTERS' PASTE

The ideal paste for the pressroom. Keeps soft and free from mold. No risk of lumps getting into the packing or overlays and battering the type. It does not swell the packing or wrinkle the paper. Also used for backing pamphlets. Added, in small quantities to inks just before the printing, it accelerates their drying.

Half-pint Can	\$0 10	Quart Can	\$0 25
Pint Can	15	Gallon Pail	75
Two Gallon Pail		\$1.25	

SPHINX TABLET CEMENT (see page 607)

STAR FLY STICKS

The small Star Wheels are set into mortises cut through the fly stick. Price of Fly Sticks per inch of length 1 cent.

When ordering, state length of stick, and whether the butt is to be grooved to fit a wooden clamp fly, or plain to fit separate socket.

The strips on top can be furnished running lengthwise with the top. Prices and descriptions of other sizes and styles on-application.

STAPLING MACHINES

THE ACME STAPLE MACHINES

These Binders differ from other binding machines in their freedom from staple obstructions. Every stroke is sure. There is no adjusting for change of work. The clinching apparatus is over a hollow cylinder, so that all dirt, dust, bits of paper and wasted staples fall through to the floor, and so do not obstruct the machine's work.

ACME STAPLE BINDER NO. 1

This machine is designed for the work in small printing offices where the occasional job of binding sent out takes away most of the profit on the job. It holds one hundred staples at a charge and binds to 1/4 inch.

Price \$6 00

This binder uses coarse or heavy wire staples only, numbers X (1/4 inch) and XX (5/16 inch).

Price per M \$0 25

ACME SURE-SHOT STAPLE BINDER

This machine works on the same principle as the Acme No. 1, but has no lever. It holds 100 staples at a charge and will bind from 2 to 50 sheets. Same style staple as No. 1. Acme Sure-Shot Binder \$3 00

ACME STAPLE BINDER No. 4

This machine is similar in appearance to the No. 6 and will stitch the same thickness on soft paper. It uses only round, fine wire staples, No. 20 (3/16 inch), No. 21 (1/4 inch), and No. 22 (5/16 inch), and does both flat and saddle-back work. Acme Staple Binder No. 4 \$27 00

ACME STAPLE BINDER No. 6

This is the most complete staple binder sold. We claim following points of merit:

Uses both fine and coarse wire staples; binds to 1/4 inch, all kinds of paper; it has an automatic clinching device; it is equipped with anti-clogging devices and with both flat and saddle-back tables; no adjusting required at all; uses fine round wire staples, No. 20 (3/16 inch), No. 21 (1/4 inch), No. 22 (5/16 inch), and flat (heavy) staples, No. 23 (1/4 inch) and No. 24 (5/16 inch). The fine wire staples used on soft paper; the coarse on hard or heavy paper. Acme Binder No. 6 \$40 00

In 5,000 lots, per M \$0 18	In 50,000 lots, per M \$0 14
In 25,000 lots, per M 15	In 100,000 lots, per M 13

STAPLING MACHINE

YARGER STAPLE BINDER, No. 10

This machine will use six different sizes of Staples, both Flat and Round wire. It will stitch through the fold and through the back from 2 sheets up to 70 sheets (Flat Staples), and from 2 sheets up to 30 sheets (Round Staples), of ordinary book or pamphlet paper, and 11 inches from margin. The wearing parts are all made of Malleable Steel, and not liable to break or get out of order. The Staple Case adjustment is far superior to any of our other Machines. Only one adjustment, and easily understood.

Price, complete with Flat and Saddle Table \$34 00

The Staples used on this machine are made of best quality wire are one-half inch wide, strung on wood, and put up in boxes of 5000.

FLAT WIRE STAPLES

No. 4 with leg $\frac{3}{8}$ of an inch long. | No. 6 with leg $\frac{1}{8}$ of an inch long.
 No. 5 with leg $\frac{1}{4}$ of an inch long. | No. 6½ with leg $\frac{3}{8}$ of an inch long.

ROUND WIRE STAPLES

No. 14 with leg $\frac{3}{8}$ of an inch long. | No. 15 with leg $\frac{1}{4}$ of an inch long.

When ordering staples please designate machine they are wanted for.

STAPLING MACHINES

YARGER BREECH LOADER BINDER No. 5

Adapted to binding small pamphlets of any thickness under 100 pages.
Yarger Breech Loader Binder No. 5 \$3 00

Uses C ($\frac{3}{16}$ inch), D ($\frac{1}{4}$ inch) and E ($\frac{5}{16}$ inch) staples, 1,000 in a box.

Prices and descriptions of other Yarger Binders cheerfully furnished.

★STITCHING MACHINES

We can furnish the New Jersey, the Monitor, the Progress and other first-class makes of Wire Stitching Machines. Catalogue and other information furnished on request.

★STEREOTYPE BLOCKS

Description and prices of the best stereotype blocks on application. When writing of blocks outside, also the sizes of the largest and smallest plates to be used on the block, always measuring the *back* of the plate.

RATCHETS FOR STEREOTYPE BLOCKS

Brass Blade, each \$0 50
Steel Blade, each 75

IRON STEREOTYPE BLOCKS

★IRON EXTENSION BLOCKS

Above illustration shows the four corner sections used with cross "A". The four corner sections are separate and made to a standard size, each measuring 2x3 inches, and when placed together they measure 4x6 inches. The block can be extended to any desired size by inserting between the corner sections the extension crosses. The three regular size crosses cover all plates from $2\frac{3}{8} \times 4\frac{3}{8}$ up to and including $5\frac{1}{8} \times 8\frac{7}{8}$ inches. Crosses are accurately made and the corner sections fit them snugly. Larger crosses made to order. (See next page.) Regular blocks allow half-inch margin. Made to order (without extra charge) for quarter inch margins.

★IRON CROSSES, "A", "B" AND "C"

This illustration shows the three Extension Crosses, the larger one with a hook and clamp. They work with **both** Extension and Register Blocks—one set of extensions answering for the two sets of Blocks.

The price of the Cross "C" does not include the hook and clamp; illustration merely shows how hook and clamp appear on the crosses.

EXTENSION BLOCKS, WITH DIFFERENT EXTENSIONS

DIMENSIONS	WITHOUT EXTENSION	WITH CROSS A	WITH CROSS B	WITH CROSS C
Outside dimension of Blocks	4 x 6	$4\frac{1}{2} \times 6\frac{3}{4}$	$5\frac{1}{4} \times 7\frac{3}{4}$	6 x 9
Largest Plate, including Bevel . . .	$3\frac{3}{8} \times 5\frac{7}{8}$	$3\frac{7}{8} \times 6\frac{3}{8}$	$4\frac{1}{8} \times 7\frac{3}{8}$	$5\frac{3}{8} \times 8\frac{7}{8}$
Smallest Plate, including Bevel . .	$2\frac{3}{8} \times 4\frac{3}{8}$	$3\frac{3}{8} \times 5\frac{3}{8}$	$3\frac{3}{8} \times 6\frac{3}{8}$	$4\frac{3}{8} \times 7\frac{3}{8}$

Iron Extension Cross B, each	1 50
Iron Extension Cross C, each	1 75
Iron Parallel Extension Strips, set	1 25

IRON STEREOTYPE BLOCKS

★IRON REGISTER BLOCKS

This illustration shows the four corner sections used with cross "A." It also shows how this block differs from the regular extension block, each corner section having two hooks, so that a plate can be moved in any direction—up or down, sideways or at an angle—without disturbing any other portion of the form. The four corner sections are separate and made to a standard size, each measuring 2x3 inches, and when placed together they measure 4x6 inches. The block can be extended to any desired size by inserting between the corner sections the extension crosses. The three regular size crosses cover all plates from $1\frac{3}{8} \times 3\frac{3}{8}$ up to and including $5\frac{1}{8} \times 8\frac{1}{8}$ inches. Crosses are accurately made and the corner sections fit them snugly. Larger crosses made to order. (See below.) Regular blocks allow half-inch margin. Made to order (without extra charge) for quarter-inch margins.

REGISTER BLOCKS WITH DIFFERENT EXTENSIONS

DIMENSIONS	WITHOUT EXTENSION	WITH CROSS A	WITH CROSS B	WITH CROSS C
Outside dimensions of blocks . . .	4 x 6	$4\frac{1}{2} \times 6\frac{1}{4}$	$5\frac{1}{4} \times 7\frac{3}{4}$	6 x 9
Largest Plate, including Bevel . . .	$3\frac{3}{8} \times 5\frac{1}{8}$	$3\frac{3}{8} \times 5\frac{7}{8}$	$4\frac{3}{8} \times 6\frac{7}{8}$	$5\frac{1}{8} \times 8\frac{1}{8}$
Smallest Plate, including Bevel . . .	$1\frac{3}{8} \times 3\frac{3}{8}$	$2\frac{1}{8} \times 4\frac{3}{8}$	$2\frac{7}{8} \times 5\frac{3}{8}$	$3\frac{3}{8} \times 6\frac{3}{8}$

Iron Parallel Register Strips, set	1 25

CABINETS FOR EITHER STYLE BLOCK

Cabinet for 16 Blocks, either style	\$10 00
Cabinet for 32 Blocks, either style	15 00

SPECIAL CROSSES

Iron crosses with or without extra hooks and clamps. When ordering special crosses for extension blocks, figure the outside dimensions of the cross as $\frac{1}{8}$ of an inch larger each way than the back of the largest plate to be worked, viz.: if the back measurement of the largest plate is 6x9, the cross should measure $6\frac{1}{8} \times 9\frac{1}{8}$ inches outside. For register blocks figure it $\frac{1}{8}$ of an inch larger each way. All crosses fit and work with both the extension and register blocks. Extra large crosses should have one hook at each four inches of width of the arms. Prices per square inch (including the space cut out for the corner sections) for special iron crosses, 6 cents. Hooks on iron crosses, 75 cents each; clamps, 15 cents each. The prices of hooks and clamps are extra.

TABLET PRESS

THE PARAGON

This press is made wholly of iron, excepting the adjustable squaring-boards, and consequently will not twist or warp under pressure, thus throwing the adjusted paper out of line.

The paper can be adjusted in a moment, no matter what its shape or size may be, so as to bring pressure of screw immediately upon the centre of it.

It is so constructed that paper can be packed or adjusted while the press stands upright or in a horizontal position, and all the squaring boards are held rigidly in position and cannot possibly be displaced, shaken, or moved while packing or adjusting paper.

If paper or cloth is to be put on edges where glue is applied, the adjustable squaring boards are placed in position to hold the paper or cloth firm until dry. It takes in all paper from

1 to 16 inches. As the pressure is applied in the centre, it never slips or slides, and requires so little pressure that the pads will not swell or crack when being taken from the press.

The Paragon Tablet Press \$75 00

TABLET BRUSHES

FLAT, DOUBLE-THICK, FRENCH BRISTLE BRUSHES

STEEL AND WOOD TYPE MEASURES

NEWSPAPER RULE "A" AND "B," MADE OF 2 POINT STEEL, 26½ INCHES LONG

Style "A" for the Foreman. Agate lines (14 to the inch) on the right side for convenience in measuring matter on the galley. Marked up to 24 inches on the left by eighths. See cut. Price, net \$3 50

Style "B" for the Deskman. Agate lines (14 to the inch) on the left for measuring advertisements. Nonpareil and pica (point system) on the right, with inch marks up to 24 extending into the center from both sides. Price, net \$3 75

COMPOSITOR'S RULE, "C," 9½ IN. LONG

Style "C" for the Compositor. Agate lines (14 to the inch) cut on the right up to 100 lines. Marked up to 7 inches on the left by eighths. See cut. Price, net \$1 50

SQUARE WOOD MEASURE

Twelve inches long, with inches by sixteenths, agate (14 lines to the inch), 5½ and 11; 6 and 12; 7, 8, 9, and 10 Point measures on the different sides. The corners are protected by brass.

Price, net \$0 30

TREFOIL WOOD MEASURE

Very accurately and sharply cut, with 5, 5½, 6, 7, 8, and 9 Points, 10½ inches long. Owing to the trefoil shape, making sharper edges, the lines and numbers can be read much easier than on a square body.

Price, net \$1 50

TYPE WASH

GROVER'S PRINTERS' DETERGENT

It is cheaper and safer than benzine, as it avoids the great risk of fire, thereby reducing the rate of insurance.

It is a fact that rollers cleaned with the Detergent will last twice as long as when cleaned with any other article in the market.

It restores rollers that have become hard and unfit for use through the effects of benzine, potash, etc., and makes them as good as new.

It cleans ink from the hands instantly, when used with a little soap, and makes them soft and white, and prevents chapping.

PRICES.

★ Barrels of 350 to 500 lbs., per lb.	\$0 08
★ Half-barrels of 150 lbs., per lb.	09
Kegs of 50 to 100 lbs., per lb.	10

Wood Rule (end wood) per foot	15
Sold corners to match any rule, set of four	25

★WOOD TYPE

Wood type furnished to order. It is not carried in stock, not even by the manufacturers and is not returnable if order is correctly filled.

Special specimen book on application.

INSTRUCTIONS FOR ORDERING WOOD TYPE

In ordering do not mutilate the specimen books, but write plainly the full title or number of the letter, stating the size of the font (whether it is a 3 a, 4 a or 5 a), and whether it is caps, caps and figures, or caps, lower case and figures, that are wanted. It will prevent the possibility of mistakes if characters and the list price of the font are stated, always state from what specimen book you are ordering.

In ordering sorts send, if possible, a perfect proof of each letter wanted. This will insure exact copies. Sorts are not carried in stock but are sent from the factory.

PRINTERS' ACCOUNT BOOK

The book is ruled and printed with provision for entering orders for all kinds of book and job work. Every item of expense in doing the work is provided for and the total cost and net profit or loss is shown on every job so entered. A complete record of all work is thus obtained and for reference this record is invaluable; particularly when an order is to be duplicated at some future time. Buy one of these books and run your shop systematically. It costs very little more than an ordinary salesbook but is worth a hundred times more on account of its completeness and labor saving advantages.

This Book is regular salesbook size and is made in two sizes, viz: 200 page book for 1000 jobs; 400 page book for 2000 jobs.

THOUSANDS IN USE

- 400 Page Book for 2000 Jobs \$5 00
- 200 Page Book for 1000 Jobs 3 50

This illustration shows part of a page in the book.

There are blanks for five jobs on each page.
